D) Watching movies	is as good as readin	g books.			
			2		

19) Some students take optional after school ...... to improve their skills .....A) tuiteon / .B) toition / .C) tuition / .D) tuision / ,

## <u>Question Two: (20 points)</u> Read the following text carefully, and then answer all the questions that follow.

In England, almost 50% of school leavers go on to higher education. The figure has not always been as high as this. Before 1998 CE, higher education in the UK was completely free for UK citizens. Since then, education fees have been introduced. Most students borrow this money from the government. They don't have to repay it immediately. Instead, they pay it back slowly out of future earnings.

Despite the high cost, most students choose to study away from home. For most young people, living away from home means borrowing even more money from the government. So why don't students choose to avoid debt by staying at home, where they don't have to pay rent? Most of them say that they want to move to the university of their choice, rather than the nearest one. Another strong motive is the desire to live in a new culture. Where do these students live? Many have rooms in halls of residence, especially in their first year; others rent flats or houses. A lucky minority live in property that their parents have bought for them. Most of them need to learn to cook, do their own washing and manage their time and money.

1. The text states three different places that students may live in when studying away from their homes. Write down two of them.

2. Students who study away from their home should do some of the daily skills. Write down two of these skills.

3. Find a word in the text which means "costs or charges".

4. What does the underlined word "<u>it</u>" refer to?

5. Students who choose to study abroad face different cultural challenges. Suggest two possible ways they can do to cope with these challenges.

## <u>Question Three: (20 points)</u> Free Writing Write a composition of about 120 words on ONE of the following:

**1.** Distance learning forces many families to change the way they follow the learning of their children. Write an article discussing the previous and the current ways that the families use to follow the progress of their children learning.

**2.** Some people believe that the main purpose of education is to help the individual to become useful for society, while others believe it should help individuals to achieve their ambitions. Discuss both sides and give your opinion.
