Read the two texts carefully, and then answer all the questions that follow.
Your answers should be based on the texts.

TEXT A

Everyone knows that the internet connects people, but now it does more than that – it connects objects, too. These days, computers often communicate with each other, for example, your TV automatically downloads your favourite TV show, or your “sat- nav” system tells you where you are . This is known as the “Internet of Things” and there’s a lot more to come.

In just a few years’ time, experts say that billions of machines will be connected to each other and to the internet. As a consequence, computers will increasingly run our lives for us. For example, your fridge will know when you need more milk and add it to your online shopping list, your windows will close if it is likely to rain, your watch will record your heart rate and email your doctor and your sofa will tell you when you need to stand up and get some exercise!

Many people are excited about the “Internet of Things”. For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings. The dream could be nightmare.

1. Some people are worried about the " internet of things " for two reasons. Mention these reasons.
2. Many machines will be connected to each other and to the internet in the future. Write down the result for this connection.
3. The text mentions many examples of the internet of things that will take place in our daily life in the future. Mention two examples of them.
4. Find a phrase in the text which has the same meaning as “controls available on computer programs which let you protect your computer from viruses”.
5. What does the underlined word it refer to?
6. Using the internet is beneficial in our life but it has also some negative points on people. Write down three possible disadvantages of using the internet.

TEXT B

Young people love learning, but they like learning even more if they are presented with information in an interesting and challenging way. Today, I am going to give a talk about how you can use technology in Jordanian classrooms.

Here are some ideas:

Many classrooms now use a whiteboard as a computer screen. As a consequence, teachers can show Websites on the board in front of the class. Teachers can then use the internet to show educational programs, play educational games, music, recordings of languages, and so on.

In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do tasks such as showing photographs, researching information, recording interviews and creating diagrams. Tablets are ideal for pair and group work.

Teachers can perhaps ask their students to start writing a blog (an online diary), either about their own lives or as if they were someone famous. They can also create a website for the classroom. Students can contribute to the website, so for example they can post work, photos and messages.

We all like to send emails, don't we? Email exchanges are very useful in the classroom. Teachers can ask students to email what they have learnt to students of a similar age at another school. They could even email students in another country. As a result, students can then share information and help each other with tasks.

1. The text mentions many new technological ways to use inside the classrooms. Mention three of them.
2. Quote the sentence that shows that tablets are used for two types of work.
3. Teachers in some schools can use whiteboards in their classrooms. Mention the result of using this device.
4. Find a phrase in the text which means (a mobile computer with a touch screen processor and battery all in one unit)
5. According to the text, tablet computers are used in classrooms to do several tasks. Write down two of these tasks.
6. Using technology in classrooms is an important way to make learning easier. Think of this statement and write down your point of view.
