

## PART ONE: READING COMPREHENSION

In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do tasks such as showing photographs, researching information, recording interviews and creating diagrams. Tablets are ideal for pair and group work.

Most young people communicate through social media, by which they send each other photos and messages via the Internet. Some students like to send messages that are under 140 letters for anyone to read. Teachers can ask students to summarise information about what they have learnt in class in the same way. If students learn to summarise quickly, they will be able to use **this skill** in future.

Teachers can perhaps ask their students to start writing a blog either about their own lives or as if they were someone famous. They can also **create a website** for the classroom. Students can **contribute to the website**, so for example they can post work, photos and messages.

### Question Number One:- (21 points)

- 1- Mention two technological means that could be used at class ?.(4 points)
- 2- Write down two uses of tablets at class? (4 points)
