Read the following text carefully, and then in your ANSWER BOOKLET, answer all the questions that follow. Your answer should be based on the text.

Ibn Bassal was a writer, a scientist and an engineer who lived in Al-Andalus in the eleventh century CE. He worked in the court of Al-Ma'mun, who was the King of Toledo; His great passions were botany, which is the study of plants, and agriculture. Although he was a great scholar, he was also a practical man and all of his writing came from his own 'hands-on' experience of working the land.

One of the many things which Ibn Bassal achieved was *A Book of Agriculture*. The book consisted of sixteen chapters which explain how best to grow trees, fruit and vegetables, as well as herbs and sweet-smelling flowers. Perhaps the most famous chapter of all was the one that described how to treat different types of soil. Ibn Bassal also worked out how to irrigate the land by finding underground water and digging wells. He designed water pumps and irrigation systems. All of these things were passed on through his writing.

The influence of Ibn Bassal's book was enormous. As farmers down the generations followed his instructions and advice, the land became wonderfully fertile and produced more than enough food for the fast-growing population. The irrigation systems that he and his followers put in place are still in evidence in Spain. Although his name is not widely known, Ibn Bassal's legacy to the world has been great.

Question Number One:

2. I think that the area around Toledo had a fast-growing population because it was very prosperous place producing a lot of food as a result of Ibn Bassal's irrigation systems. As a result , people could be healthier and more able to provide healthy atmosphere to their

Scientists have successfully invented a prosthetic hand with a sense of touch. It is an exciting new invention, which they plan to develop. It is possible that, in the not-too-distant future, similar artificial arms and legs will have taken the place of today's prosthetic limbs.

Dennis Sorensen, a 39-year-old from Denmark, was the first person to try out the new invention. After losing his left hand in an accident, he had been using a standard prosthetic hand for nine years. The new hand, which was developed by Swiss and Italian scientists, was a huge improvement. With it, Sorensen could not only pick up and manipulate objects, but he could also feel them. 'When I held an object, I could feel if it was soft or hard, round or square, he explained. He said that the sensations were almost the same as the ones he felt with his other hand.

Unfortunately, Sorensen was only taking part in trials, and the equipment is not ready for general use yet. He was only allowed to wear it for a month, for safety reasons. So now he has his old artificial hand back. However, he hopes that soon he will be wearing the new type of hand again. He is looking forward to the time when similar artificial limbs are available for the thousands of people who need them. He will have helped to transform their lives.

C . FREE WRITING:

In your ANSWER BOOKLET, write a composition of about 80 words on ONE of the following:

1. Megaprojects are extremely large investment projects. Write an article about these the advantages and disadvantages of such project and the reasons behind designing them.
2. Nowadays, more and more people trend to shop online. Write an essay discussing the advantages and disadvantages of online shopping.
3. Health conditions in Jordan are among the best in the Middle East. Write a report about health facilities in your area. Remember to include a title, and supply factual information.

Megaprojects

Megaprojects are extremely large investment projects, which are designed to encourage economic growth and bring new benefits to cities. Also, include installing the latest technology that helps cities to become environmentally- friendly.

Although megaprojects vary in terms of size and cost, they are all, by definition, expensive, public projects that attract a high level of interest and media coverage. Projects range from motorways, airports, stations, tunnels, bridges, etc. to entire city complexes. The concept of a megaproject is always based on the benefits it brings to a community. However, many megaprojects have been criticised because of their negative effects on a community or the environment. They are all brand new and some people think it would be better to spend the money on regenerating old towns.

Online shopping

Most people now use the Internet on computers, smartphones and tablets to do a variety of tasks. For many people, these tasks include online shopping. From shopping for groceries to all kinds of clothes shopping, consumers are finding this the easiest way to get what they need, literally at the touch of a button. However, there are numerous and important disadvantages to shopping in this way.

Although using the Internet to shop is usually fairly easy, and there is often greater variety available, it is always a risk because you cannot try on or see in detail the item you wish to buy. In fact, the immediate 'convenience' of shopping in this way can end up being an inconvenience if the item is faulty or does not fit, or is just not what the customer wanted. It is true that the prices are better when you shop online, but, while it might be cheaper, there is a distinct disadvantage because you have to wait for the delivery of the purchases. Some people might prefer not to have any personal contact while shopping online, but it can save time in the end since there are always assistants to help with queries you might have during the transaction. In addition to this, there is the issue of Internet payment security; however, recently this has improved a lot.

The Internet has indeed given us a wider choice as consumers, as well as made some aspects of shopping more pleasant and convenient. However, it is nearly impossible, in my opinion, to forget the disadvantages we experience from time to time, since these can and do influence the way in which we choose to shop.

Health facilities in my area

The aim of this report is to shed the light on health facilities in my area .It is a crowded place but Thanks to God that we have well-equipped and highly developed health facilities .

Health centers

There are two modern governmental health centers in my area . Although these centers are crowded , they provide good health services to many people . There are other private health centers that provide health services to the people who don't have health insurance (security).

Hospitals

My area has two big hospitals : the military hospital and another private hospital . These two hospitals have well-trained staff : doctors and nurses . Un fortunately , more than 50 per cent of people complain about crowdedness in these hospitals .

Recommendations

It appears that crowdedness is the major problem concerning health facilities in my area. Therefore , suggest the following steps to ease or get rid of crowdedness .

Building a new hospital that can serve 200 beds .

Providing the hospitals and the health centers with more doctors .
