#### Who were the Nabateans من كان الانباط

In Petra, Jordan, there lie the remains of a majestic city carved out of the desert rock. This city was the main area inhabited by the Nabateans, who migrated gradually from Arabia during the 6<sup>th</sup> century BCE. Originally, they were a nomadic people who chose to settle in various places, such as southern Jordan, the Naqab Desert and northern Arabia.

There is little about the lifestyle of the Nabateans, except that they were important traders in the ancient world. They might have traded goods such as spices, gold and animals with civilizations such as China, India and Rome because of their convenient position at a commercial crossroads in the world.

Many Roman writers wrote about what the Nabateans culture must have been like, but no one knows for sure. However, they agree that the language of the Nabateans could have been a mixture of Arabic and Aramaic. These Roman writers also say that the Nabateans were ruled by a royal family, and that, unlike many cultures in the ancient world, the Nabatean society might not have used any slaves. In addition to that, the Nabateans must have been expert engineers because they managed to build complicated water conservation systems in the desert terrain.

Despite archaeologists' best efforts; there is a limit to what **they** can tell us about these fascinating people who lived in Jordan such a long time ago. Although it is still difficult to know much, they can't have been literate because there are some inscriptions that remain. However, sadly for us, most of the things the Nabateans made and owned have been too easily destroyed by time or lost in the desert.

#### Questions

1. Where did the Nabateans choose to live after emigrating from Arabia?  
They chose to live in Southern Jordan, the Naqab Desert and northern Arabia.
2. What evidence is there to show that the Nabateans were excellent engineers?

There are remains of complicated water conservation systems in the desert terrain.

3. How was the Nabatean culture different from other cultures?  
The Nabatean society might not have used any slaves.

4. The Nabateans were nomads before they choose to settle in Petra. What reason can you think of that might have influenced them to settle? I think they might have been influenced by a better place to live in. It might have a better climate, for example.

5. Why were the Nabateans skilled traders?

Because they managed to build complicated water conservation system in the desert terrain.

6. Why is it impossible that the Nabateans were illiterate?

Because there are some inscriptions that remain.

7. The language of the Nabateans was a mixture of two languages. Mention these two languages.

A mixture of Arabic and Aramaic.

8. Quote the sentence which indicates what happened to most of the remains and ruins of the Nabateans.

However, sadly for us, most of the things the Nabateans made and owned have been too easily destroyed by time or lost in the desert.

## Text 2 The Minoan civilization

الحضارة الميناوية

The Minoan civilization ruled the Mediterranean Island of Crete for 1,500 years, until it was destroyed in 1450 BCE. The Minoans built the first paved roads in Europe and introduced running water. **They** had a powerful **navy**, which might have been why they were such a strong civilization for so long.

For many years people have been trying to find why this developing civilization might have disappeared. Even after Crete was hit by a large earthquake around 1,700 BCE, the Minoans rebuilt their cities. So what caused their civilization to end?

Many experts say that the end of the Minoan civilization might have been caused by the eruption of a volcano on the nearby Island of Santorini, almost 3,500 years ago.

However, at Knossos in Crete, scientists have been examining deposits of ash, marine species, cattle bones and seashells in the soil. How could these deposits have got there? The only answer is that they must have been deposited in Crete by a tsunami.

Experts have now pieced together a possible explanation of what might have happened. They believe that several tsunamis might have hit the northern and eastern shores of the island, every thirty minutes due to the eruption of the volcano on Santorini. It must have been a terrifying experience for the Minoans living there!

### Questions الاسئلة

- 1- Which island the Minoan civilization ruled?  
The Mediterranean Island of Crete
- 2-How did the Minoans contribute to the development of civilization?  
By introducing paved roads and running water
- 3-What does the underlined word **they** refer to?  
the Minoans
- 4-Why were the Minoans such a strong civilization for so long?  
They had a powerful navy.

5-Why is the disappearance of the Minoan civilization a mystery?

Because they were a strong civilization for along time, even rebuilding their cities after an earthquake.

6- What was the main reason of the end of the Minoan civilization?

By the eruption of a volcano on the nearby Island of Santorini, almost 3,500 years ago.

7-What evidence made the experts believed that Crete was hit by tsunamis?

Because deposits of ash, marine life, cattle bones and seashells have been found in the soil.

8-If a civilization from our days disappeared all of a sudden, what kind of evidence do you think it would leave behind it?

I think a civilization would leave behind things like recent technology and also things of everyday life.

9- Quote the sentence which indicates that people tried very hard to know the reason of Minoan's disappearance.

For many years people have been trying to find why this developing civilization might have disappeared.

### Text 3 Crude oil النفط الخام

Crude oil is currently the most important source of energy in the world. It is fossil fuel which is formed over many years by the decomposition of organic compounds or anything that contains the element Carbon.

These organic materials come from the remains of animals and plants. When sediment and other organic materials are buried deep under the ground under high temperature and pressure, crude oil is formed.

It then undergoes many different processes before it is ready to be used as energy, and from it we get petrol, diesel and kerosene, among other fuels. However, due to the time taken to form new supplies of crude oil, it is considered to be a finite, non-renewable source of energy.

#### Questions:

1- What is the most important source of energy?

Crude oil is currently the most important source of energy in the world

2- Define the Crude oil. /or: What do we mean by Crude oil?

It is fossil fuel which is formed over many years by the decomposition of organic compounds or anything that contains the element Carbon.

#### **Text four      Non-renewable energy      الطاقة الغير متجددة**

Jordan depends a lot on foreign energy sources. Ninety-six per cent of the country's energy comes from oil and natural gas imported from neighbouring Arab countries. Because of this dependence on other countries, Jordan has invested in research projects to identify alternative sources of energy.

At the moment, imported natural gas is used to fulfill the country's energy needs and to generate electricity. However, a recent discovery of natural gas in Jordan means that, in the future, less natural gas will need to be imported. Oil shale rock has also found in Jordan, most notably in the west-central area. **Shale** oil can be produced from this type of sedimentary rock. It is a substitute for crude oil, but the extraction process for shale oil is more expensive. The process is also quite dangerous and produces a lot of waste product. At the moment, no shale oil industry exists in Jordan but several companies are considering using it to generate thermal power.

Nuclear power holds hope for Jordan's future energy supply. Plans are in place to construct two nuclear reactors **which** will double the country's electricity generation capacity. Jordan plans to get 60 per cent of its energy needs from nuclear energy by 2035 CE.

#### **Questions**

1- Ninety-six per cent of Jordan's energy comes from two kind of resources. Write down these two resources.

Oil and natural gas

2- Where does Jordan import oil and natural gas from?  
neighbouring Arab countries

3- Why has Jordan invested in research projects to identify alternative sources of energy?

4- Imported natural gas used for two purposes. Write down these two purposes.

to fulfill the country's energy needs and to generate electricity.

5- What does a recent discovery of natural gas in Jordan mean?  
that, in the future, less natural gas will need to be imported.

6- Where has oil shale rock found in Jordan?  
in the west-central area.

7- What has found in the west-central area of Jordan?  
Oil shale rock

8- What type of rock can shale oil produced?  
sedimentary rock

9- What is it a substitute for crude oil?

Oil shale rock

10- Shale oil industry doesn't exist in Jordan for many reasons. Write down two of these reasons.

The extraction process for shale oil is more expensive. The process is also quite dangerous and produces a lot of waste product.

11- Why are several companies using shale oil?  
to generate thermal power.

12- How many nuclear reactors will be constructed in Jordan?  
two nuclear reactors

13- What will double the country's electricity generation capacity?  
Shale oil / nuclear power

14- Mention three of the non-renewable energy resources in the text?  
natural gas 2- shale oil 3- nuclear power

15- What does the underlined word **which** refer to?  
Two nuclear reactors

16- What does the underlined word '**shale**' mean?  
A type of soft rock that oil can be extracted from

### **Text 5 Queen Rania**

Queen Rania of Jordan, speaking at a conference in abu Dhabi, considered the problems of non-renewable energy for future generations. She said “those who have had the least to do with climate change and energy crises are paying the highest price,” and continued by proposing steps towards creating a brighter future for children.

Queen Rania suggested that all people in power in the Middle East should encourage their countries to start using renewable energy sources, and she even suggested that children and schools should be part of the solution.

This solution comes from spreading knowledge and awareness about the use and preservation of the Earth’s resources.

From her wise words, we can take some valuable lessons: firstly, that everyone must work to gather to create a world in which there can be continuous development, and secondly that nobody is too small to help to achieve this.

## Text 6 Calories and health      السعر الحراري والصحة

A calorie is a unit of energy. When you hear that a substance contains 100 calories, it's a way of describing how much energy it gives your body. Most foods and drinks contain calories. Some foods, such as lettuce, contain few calories—a cup of lettuce, for example, contains fewer than ten calories.

One gram of protein or carbohydrate contains 4 calories, and the same amount of fat contains more than double that number – 9 calories. So, to find out how many calories there are in a type of food, you can multiply the number of grams by the number of calories in a gram of that food group. We all need energy, so a healthy, balance diet includes the right number of calories – not too many, and not too few.

Teenagers need more calories than younger children. Teenage boys on average need 2,200 to 3,200 calories a day, and girls of the same age need 1,88 to 2,400 calories a day. However, whether they are girls or boys, teenagers who are active and move around a lot will need more calories than those who don't.

If you eat more calories than your body needs, the leftover calories are converted to fat. Too much fat can lead to health problems. Exercising is really important, too, because activity burns calories.

### Questions:

1- Define the calorie?

A calorie is a unit of energy

2- There are many foods and drinks that contain calories. Write down two of these foods and drinks.

Some foods, such as lettuce, contain few calories—a cup of lettuce, for example, contains fewer than ten calories.

3- How do we know how many calories are there in a type of food?

you can multiply the number of grams by the number of calories in a gram of that food group

4- What will happen if we eat more calories than our body needs?

the leftover calories are converted to fat.

5- Why is exercising very important?

because activity burns calories.

6- What can much fat lead to?

health problems

7- What does the underlined word they refer to?

teenagers

### **1- Advantages and disadvantages of solar power**

There are many advantages worth considering when it comes to solar energy and everything that it offers.

Solar energy is a completely renewable resource. Solar cells make absolutely no noise at all. Very little maintenance is required to keep solar cells running. Further more, solar energy creates absolutely no pollution.

On the other hand, some days you may still need to rely on oil to power your home. Solar power cannot be used during a storm, on a cloudy day or at night. This limits how much power can be saved for future days.

The solar cells and solar panels that are needed to use solar energy tend to be very expensive when you first purchase them.

### **- An essay about the importance of cruel oil**

Crude oil is still one of the cheapest sources of a storable, transportable energy. Only natural gas, coal, wood, and some other biomass are cheaper sources of energy.

Without oil, it is likely the world would have a much smaller population at present. Oil enabled modern agriculture to supply cheap food. Oil supplies cheap energy making the manufacture and transport of many products inexpensive enough to change the entire world economy.

At present, there is a fairly direct relationship between oil consumption and economic activity.

### **- An essay about reading habits**

I read all kinds of books, the Holy Quran, magazines and newspapers. I also read a wide variety of genres. My tastes are very different. Mostly, I just enjoy discovering and experiencing new things.

First thing in the morning, I read the Holy Quran, and then I look at feeds from various and news sites. It usually takes me 45 minutes to an hour to scan these feeds and read the articles that catch my attention.

At the end of the day, right before bed, I try to read for 30 minutes or so.

This is always a physical book. I am currently reading a book on search engine optimization, I have to be careful, because if the book is too stimulating it keeps me up thinking.

## Write a short story -

### First flight

The waitress was kind and helpful, giving their smiles automatically, but my fear was getting larger and larger that the cold smiles around couldn't calm me down. The captain welcomed us and hoped we have a happy flight. With my heart in my legs, I grabbed my father's hand and closed my eyes. When the plane took off, I felt as if we were along going up nowhere in a vast satanic space, leaving the planet earth forever. It was a terrible feeling.

My father looked at me. He was shocked to see me pale and shaking. He took me in his arms and kissed me. I felt secure and safe. Then I went in deep sleep until we arrived at Dubai airport. An experience I would never forget and never wish to live again.

- Write a story about unusual event that happened to you when you were a child.

I had gone to bed just after midnight and I was only half-asleep when the wind starts blowing. Ten minutes later my bedroom window shattered with a terrible crash. Immediately, I leapt out of bed and rushed to my brothers' bedroom to check that Ahmed and Fadi were all right. When I went into their bedroom, I found Ahmed staring out of the window, watching the storm. Our younger brother Treq was still sleeping peacefully. Our mother was still sleeping, but our father was already dressed and doing everything he could to protect our house from the
