Text 1

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow each text .Your answers should be based on the texts.

"Complementary Medicine: is it really a solution"

Most doctors used to be sceptical about the validity of homoeopathy acupuncture and other forms of complementary medicine. If patients wanted to receive this kind of nonconventional treatment, **they** used to have to consult a private practitioner **who** was likely not to have a medical degree. However, in recent years, the perception of this type of treatment has changed .These days, many family doctors study complementary Medicine alongside conventional treatments, and many complementary medicine Consultants also have medical degrees.

Whereas critics used to say that there was no scientific evidence that non- Conventional treatments actually worked, now it is more common for medical experts to recognize that conventional medicine may not always be the only way to treat an Ailment.

At a surgery in London, 70 percent who were offered the choice between a herbal or a conventional medicine for common complaints such as insomnia, arthritis and migraines chose the herbal remedy. Fifty percent of patients then said that the treatment helped. One doctor said, "I now consider homoeopathy to be viable option for many different conditions, including anxiety, depression and certain allergies. It provides another option when conventional medicine doesn't address the problem adequately.

However, complementary medicine cannot be used for all medical treatments. **It** can never substitute for immunisations as it will not produce the antibodies needed to protect against childhood diseases. It also cannot be used to protect against malaria.

One doctor said, "I will always turn to conventional medical treatment first to ensure that no underlying condition is missed. However, the idea of complementary treatments is no longer an alien concept. In my opinion, it should work alongside modern medicine, and not against it.

Question Number One: (20 points).

A professional craftsman

Adnan, a professional craftsman, is at work in his studio. With the oven at 1,400 degrees Centigrade, 20 hours a day, a glass-making studio isn't the most comfortable place to be. For Adnan, however, this is more than just a job. "My family has been blowing glass for around 700 years," he says. "My father learnt the craft from his father, and he taught it to me when I was a child". He is passionate about this ancient craft, and regularly gives demonstrations and workshops to teach young people the skills of glassblowing. He strongly believes that unless we interest more young people in learning the craft, nobody will know how to make hand-blown glass in the future. "These days, young people don't always want to follow their parents' professions, and, added to that, glassblowing isn't an easy job. It has to be an obsession, as it is for me!"

He still uses the technique that was first developed by the Phoenicians some 2,000 years ago. First, he pushes a thin metal blowpipe into the boiling hot furnace. Secondly, he lifts out the liquid sand and lays it on a metal plate. After that, he blows the red-hot glass until it becomes more flexible. Then he pulls and bends the glass into shape. He has to work extremely quickly because the liquid sand is already solidifying into glass. Adnan is making a delicate swan. Through the semi-opaque glass, you can see fine lines of turquoise, green and blue.

"The sand gives us transparent, or 'white', glass," Adnan explains. "We get this beautiful dark, cobalt blue by adding the metal cobalt to the melted glass. Then, this blue becomes a lighter, sea-green turquoise after adding copper. Finally, we decorate the glass by hand."

"These days we recycle broken glass. We also use commercially produced colours instead of using natural ingredients as in the past. Apart from that, nothing else about this craft has changed through the centuries. You can't use a machine to do this work," he says. "The old ways are still the best."

Answer the following questions:-

1. Adnan says that a glass-making studio isn't the most comfortable place to be for two reasons. Write down these two reasons.

2. Find a word that means "**clear enough to see through**"
3. Quote the sentence that indicate glassblowing is a handicraft that can not be done with machines.
4. According to Adnan, why are not there many young people who want to learn glassblowing? Give two reasons.
5. Quote the sentence which shows that Adnan still follows the traditional ways for glassblowing.
6. How could Adnan endure this extremely tiring and hard job?
7. According to Adnan, how could we preserve glassblowing job?
8. Why does Adnan have to work so fast while shaping hot glass?
9. What has changed about the craft of glassblowing through the centuries? Write down two changes.
10. What do the underlined pronouns "**their**" and "**it**" refer to?

B. Critical thinking:-

- 1- Adnan says " These days, young people don't always want to follow their parents' professions." Explain the statement suggesting three things that can be done to encourage young people to learn ancient handicrafts.
 - 2- Is it good to wait for luck or must you make your own success. Think of this statement and, in two sentences, write down your point of view.

Health in Jordan: A report

Health conditions in Jordan are among the best in the Middle East. This is largely due to the country's commitment to making healthcare for all a top priority. Advances in education, economic conditions, sanitation, clean water, diet and housing have made our community healthier.

As a result of careful planning, the number of healthcare services has been increasing rapidly over the past years. More than 800 different kinds of healthcare centres have been built, as well as 188 dental clinics. In 2012 CE, 98 per cent of Jordanian children were fully immunised, thanks to immunisation teams that had been working towards this goal for several years. Although there were remote areas of the country where people had been without consistent access to electricity and safe water, almost 99 per cent of the country's population now has access.

Although the country has been focusing mainly on improving its primary healthcare facilities, it has not neglected its advanced medical facilities. The reputation of Jordanian doctors has spread in the region, and now many more patients come to Jordan for open heart surgery. In Jordan, the open heart surgery programme started in 1970 CE in Amman.

The life expectancy figures show that Jordan's healthcare system is successful. In 1965 CE, the average Jordanian's life expectancy was age 50. In 2012 CE, this average life expectancy had risen to 73.5. According to UNICEF statistics, between 1981 CE and 1991 CE, Jordan's infant mortality rates declined more rapidly than anywhere else in the world – from 70 deaths per 1,000 births in 1981 CE to only 32 deaths per 1,000 births in 2014 CE.

The low infant mortality rate, as well as the excellent healthcare system, have been contributing factors to Jordan's healthy population growth, which will result in a strong work force with economic benefits for the whole country.

1- According to this report, there are many factors that have made the community in Jordan healthier. Write them down.

2- Why do more and more people come to Jordan for open heart surgery?

3- Quote the sentence that indicates Jordanian live longer than they did in the past?

4- What was the role of the immunisation teams?

5- Write down the sentence that implies how infant mortality rates changed over the years.

6- Find a word in the last paragraph which means " **decreased in quantity or importance**" and " **death, especially on a large scale.**"

7- What does the underlined pronoun "**its**" refer to?

8- According to the report, what are the factors that have contributed to Jordan's health population growth?

9- What was the effect of the continuous immunisation programme on infants of Jordan?

B. Critical thinking

"Healthcare alone doesn't make a healthy community". Think of this sentence and write your point of view in two sentences.
