Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow it. Your answer should be based on the text.

Water is essential for life. Our wellbeing, sanitation, agriculture and industry all count upon a supply of water. Beyond these uses, water brings countless other benefits to society. We use it to swim in, sail on and take pleasure in the numerous plants and animals that depend on it. In addition, our health and environment are reliant on an effective wastewater infrastructure.

Jordan's scarcity of water is a long-term challenge for environmentalists. Water resources in Jordan have remained quite stable over the years, but Jordan has become a densely-populated country. Current use of water already exceeds renewable supply. Consequently, the Jordanian governments have released the following notice to commence raising awareness of this matter.

1. Jordanians must recognise that the available water supply is finite, and they must take responsibility for this issue within their own households.
2. Accountability must be assumed for water management in Jordan. This responsibility should be recognised by individual citizens, the public sector and the private sector alike. The situation necessitates the combined effort of the Jordanian people to improve conditions within their own environs.
3. A deeper understanding of the available amounts, actual quality and natural protection of Jordan's water resources must be reached. This knowledge will be circulated in schools and throughout the community.
4. Water must be used more efficiently, with more regard for energy needed to heat water for daily usage.
5. Healthy aquatic ecosystems are vital to a high quality of life for Jordanians and must be preserved.
6. The quality and standards of drinking water will be consistently maintained to ensure that Jordanians have potable water that is free from pollutants.

Question Number One:-

A.

- 1- The writer mentions that water is important for all the sectors of our life, write down two of them.
- 2- There are many uses of water, write down two of them.
- 3- Quote the sentence which indicates that Jordan is a crowded.
- 4- Responsibility of water management in Jordan should be recognized by three sectors, mention them.
- 5- Find a word in the text which means "greater concern"
- 6- What does the underlined pronoun "they" refer to?
- 7- The text says that "This knowledge will be circulated in schools and throughout the community" explain this statement.

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow it. Your answer should be based on the text.

Petra, Jordan, there lie the remains of a majestic city carved out of the desert rock. This city was the main area inhabited by the Nabateans, who migrated gradually from Arabia during the 6th century BCE. Originally, they were a nomadic people who chose to settle in various places, such as southern Jordan, the Naqab Desert and northern Arabia.

There is little known about the lifestyle of the Nabateans, except that they were important traders in the ancient world. They might have traded goods such as spices, gold and animals with civilisations such as China, India and Rome because of their convenient position at a commercial crossroads in the world.

Many Roman writers wrote about what the Nabatean culture must have been like, but no one knows for sure. However, they agree that the language of the Nabateans could have been a mixture of Arabic and Aramaic. These Roman writers also say that the Nabateans were ruled by a royal family, and that, unlike many cultures in the ancient world, the Nabatean society might not have used any slaves, in addition to that, the Nabateans must have been expert engineers because they managed to build complicated water conservation systems in the desert terrain.

Despite archaeologists' best efforts; there is a limit to what they can tell us about these fascinating people who lived in Jordan such a long time ago. Although it is still difficult to know much, they can't have been illiterate because there are some inscriptions that remain. However, sadly for us, most of the things the Nabateans made and owned have been too easily destroyed by time or lost in the desert.

Question Number One:-

- 1- The Nabateans must have been expert engineers, why?
- 2- Quote the sentence which indicates that the Nabateans could read and write.
- 3- The Nabateans traded with many different civilisations, write down two of them.
- 4- Find a word that means " **not having learnt to read or write**"?
- 5- What does the underlined word "they" refer to?
- 6- The Nabateans settled in different places, write down two of them.
- 7- The Nabateans' culture is part of our history. Suggest two ways to preserve this culture.

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow it. Your answer should be based on the text.

The earliest form of pizza was invented when soldiers needed food to take with them on long marches. They baked a kind of bread flat on their shields and then covered it with cheese and dates. This early pizza was convenient, healthy food for people who were constantly on the move. The wheat flour base provided energy in the form of carbohydrates, the cheese gave the soldiers calcium, which kept their bones and teeth healthy, and the dates provided protein, fiber and various vitamins and minerals that are necessary to keep the body healthy. Pizza is also mentioned in the 3rd century BCE, when there was written evidence of a flat round bread that had olive oil, herbs and honey on the top. It was baked on hot stones.

When people explored the remains of Pompeii, Italy, they found evidence of a flat flour cake that was baked and widely eaten there at that time. There was also evidence of the first pizza restaurants in Pompeii in the 16th century CE. Visitors can see the pizza ovens in the ruins, even today.

In 1522 CE, travellers returning to Europe from Peru brought back tomatoes with them. The people of Naples added the new tomatoes to their bread, which consisted of flour, oil, salt and yeast, and created the first simple pizza.

In 1899 CE, the King of Italy and his wife, Queen Margherita, were on holiday in Naples in Italy. They asked a famous pizza chef to come and cook for them. He prepared three kinds of pizza. The Queen's favourite one was the one that had been made with a white cheese called mozzarella, a green herb called basil, and ripe, red tomatoes. These were exactly the colours of the Italian flag. The chef named this pizza in honour of the Queen: the Margherita.
