

The Hashemite kingdom of Jordan – الامتحان الثاني
General English Exam (Unit 3 + Unit 4)

Read the following article carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the article.

The King Hussein Cancer Center (KHCC) is Jordan's only comprehensive cancer treatment centre. It treats both adult and paediatric patients. Patients come not only from Jordan but also from other countries in the region, as they are attracted by its excellent reputation, lower costs, and cultural and language similarities. In order to cope with the increase in demand for treatment, the KHCC has begun an expansion programme. The hospital will have more than doubled its capacity by 2026 CE, increasing space for new cancer cases from 3,500 per year to 9,000. By then, they will have added 182 extra beds, along with bigger units for different departments, including radiotherapy. Additionally, they will have built a special ten-floor outpatients' building, with an education centre which will include teaching rooms and a library.

However, many cancer patients live far away from Amman, where the KHCC is located, and the journey to and from the hospital is often difficult. For this reason, there are plans to extend cancer care facilities to other parts of Jordan. In the near future, King Abdullah University Hospital in Irbid hopes to set up radiotherapy machines, so that cancer patients from northern Jordan will not have to go to Amman for radiotherapy treatment.

A new cancer drug is being trailed in Plymouth, UK, which doctors hope will extend the lives of cancer patients and reduce their symptoms overnight. It is taken as a single pill every morning, and so far patients have shown none of the usual side effect such as the sickness and hair loss that are experienced when undergoing other forms of cancer treatment. It will improve patients' life expectancy and quality of life much more quickly than any other treatment. The patients were interviewed a year after starting the treatment and are fit and well.

Question Number One (32 Points)

1. The article states some features of the expansion programme in the future in the KHCC. Write two examples? (4 Points)
2. There are some main side effects of the other forms of cancer treatment. Write down two of these effects. (4 Points)
