GENERAL ENGLISH**

DATE: July, 2020

(الكتاب الجديد / خطة ٢٠٢٠)

TIME: TWO HOURS

ملحوظات: (١) أجب عن جميع أسئلة هذه الورقة (٢) للمتقدمين لجميع الفروع الأكاديمي

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the article.

Health conditions in Jordan are among the best in the Middle East. This is largely due to the country's commitment to making healthcare for all a top priority. Advances in education, economic conditions, sanitation, clean water, diet and housing have made our community healthier.

As a result of careful planning, the number of healthcare services has been increasing rapidly over the past years. More than 800 different kinds of healthcare centres have been built, as well as 188 dental clinics. In 2012 CE, 98 per cent of Jordanian children were fully immunised, thanks to immunisation teams that had been working towards this goal for several years. Although there were remote areas of the country where people had been without consistent access to electricity and safe water, almost 99 per cent of the country's population now has access.

Although the country has been focusing mainly on improving its primary healthcare facilities, **it** has not neglected its advanced medical facilities. The reputation of Jordanian doctors has spread in the region, and now many more patients come to Jordan for open heart surgery. In Jordan, the open heart surgery programme started in 1970 CE in Amman.

The life expectancy figures show that Jordan's healthcare system is successful. In 1965 CE, the average Jordanian's life expectancy was age 50. In 2012 CE, this average life expectancy had risen to 73.5. According to UNICEF statistics, between 1981 CE and 1991 CE, Jordan's infant mortality rates declined more rapidly than anywhere else in the world – from 70 deaths per 1,000 births in 1981 CE to only 32 deaths per 1,000 births in 2014 CE.

The low infant mortality rate, as well as the excellent healthcare system, have been contributing factors to Jordan's healthy population growth, which will result in a strong work force with economic benefits for the whole country.

Question Number One

A

- 1- The report states two factors that contribute to Jordan's healthy population growth. Write down the two factors.
- 2- Find a word in the text which means "**the process by which an individual's immune system becomes protected against an illness**".

تمنياتى للجميع بالتوفيق

ADNAN AL SUKHNI

THE END

In the last two decades there has been an great increase in computer use worldwide followed by a similar expansion of mobile phone ownership. Technological advances in those technologies have had a major impact on the way people use technology in their lives, including the way people spend their leisure time. Increased accessibility of data extended computer use beyond the business and gaming sectors. The expansion of search engines widened the user base dramatically.

After 2004 the introduction and popularity of social media websites further expanded internet audiences. As computers came down in price ownership levels went up. The emergence of mobile phones followed a similar exponential growth. In the last decade 3G mobile phone technologies provided internet access by mobile phone, and this change enabled people in emerging countries to leapfrog the computer stage and access the internet from their phones. The way people communicate has also changed. When social networking emerged it stimulated an exponential expansion in use of sites such as Facebook. These changes have all had a major impact on the way people conduct their lives. Social networking and social media have changed the way people interact and how much time they spend interacting and what other activities are displaced. These trends have some similarities across cultures, but the profiles of user behavior changes in different cultural and socio-economic contexts as well as in different age groupings. These changes have had a major impact on leisure activities in both developed and emerging economies: what people do, the way people pursue those activities in both their home locations, and when and how they travel.
