المادة English language

READING: For questions (1-7) Read the following text carefully, and then choose the correct answer from A, B, C or D to complete the sentence below each text.

1) Most young people communicate through social media, by which they send each other photos and messages via the Internet. Some students like to send messages that are under 140 letters for anyone to read. Teachers can ask students to summarize information about what they have learnt in class in the same way. If students learn to summarize quickly, they will be able to use this skill in future. We all like to send emails, don't we? Email exchanges are very useful in the classroom.

- The skill that students will be able to use in future if they learn to perform it rapidly is -----.

A) sending messages B) taking photos C) reading D) summarization

2) The first computer game was produced in 1962 CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers. The first PC (personal computer) was produced in 1974 CE, so people could buy computers to use at home. In 1983 CE, people could buy a laptop for the first time. Then, in 1990 CE, the British scientist Tim BernersLee developed the World Wide Web.

- The word which means "a flexible, removable magnetic disk" in the text is a.....

A) computer game B) computer mouse C) floppy disk D) personal computer

3) Another way of communicating with other schools is through talking to people over the computer. Most computers have cameras, so you can also see the people you are talking to. In this way, students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to them. You can also use this system to invite guest speakers to give talks over a computer. For example, scientists and teachers from another country could give a lesson to the class.

- The system that can be used to invite guest speakers to give a lesson to the class is - -----.

A) email exchanges

B) social media

C) computers which have cameras

D) computers which have filters

4) In just a few years' time, experts say that billions of machines will be connected to each other and to the Internet. As a consequence, computers will increasingly run our lives for us. For example, your fridge will know when you need more milk and add **it** to your online shopping list; your windows will close if it is likely to rain; your watch will record your heart rate and email your doctor; and your sofa will tell you when you need to stand up and get some exercise.

- The underlined word (it) in the text refers to-----

A) fridge

B) the internet

C) milk

D) computers

5) Many people are excited about the 'Internet of Things'. For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings. The dream could easily become a nightmare.

- Some people are excited about the "Internet of Things" because -----.

A) they want to keep control of their own lives

B) their lives will be easier and more comfortable

C) they want to keep control of their own things

D) they are sure that the dream is coming true

6) People have been using types of computers for thousands of years. A metal machine was found on the seabed in Greece that was more than 2,000 years old. It is believed that this was the first ever computer. In the 1940s, technology had develop enough for inventors to make the first generation of modern computers. One such model was so large that it needed a room that was 167 square metres to accommodate it. During that decade, scientists in England developed the first computer program. It took 25 minutes to complete one calculation. In 1958 CE, the computer chip was developed.

-The sentence which shows that the first generation of modern computers was very slow is -----.

A) It is believed that this was the first ever computer

B) During that decade, scientists in England developed the first computer program.

C) It took 25 minutes to complete one calculation

D) In the 1940s, technology had develop enough for inventors to make the first generation of modern computers

7) Many classrooms now use a whiteboard as a computer screen. As a consequence, teachers can show websites on the board in front of the class. Teachers can then use the Internet to show educational programmes, play educational games, music, recordings of languages, and so on. In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do tasks such as showing photographs, researching information, recording interviews and creating diagrams. Tablets are ideal for pair and group work.

- The technological device that can be used to record interviews with people is a--

- A) blog B) whiteboard C) tablet computer D) board
