Question Number One (19 points)

www.awa2el.net

Read the following text carefully, and then answer all the questions that follow. Your answers should be based on the text.

Young people love learning, but they like learning even more if they are presented with information in an interesting and challenging way. Today, I am going to give a talk about how you can use technology in Jordanian classrooms.

Many classrooms now use a whiteboard as a computer screen. As a consequence, teachers can show websites on the board in front of the class. Teachers can then use the Internet to show educational programmes, play educational games, music, recordings of languages, and so on.

In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do tasks such as showing photographs, researching information, recording interviews and creating diagrams. Tablets are ideal for pair and group work.

Most young people communicate through social media, by which they send each other photos and messages via the Internet. Some students like to send messages that are under 140 letters for anyone to read. Teachers can ask students to summarise information about what **they** have learnt in class in the same way. If students learn to summarise quickly, they will be able to use this skill in future.

We all like to send emails, don't we? Email exchanges are very useful in the classroom. Teachers can ask students to email what they have learnt to students of a similar age at another school. They could even email students in another country. As a result, students can then share information and help each other with tasks.

Question Number One (19 points)

1- Students can use tablets to do many activities, write down two of them. (2 pts)

.....
.....

2- Quote the sentence which shows that students send each other short messages. (2 pts)

.....
.....
