1

Part One : Reading

Read the following texts carefully and then in your ANSWER BOOKLET, answer all the questions that follow. Your answers should be based on the text.

¹ It's normal to feel a bit blue from time to time. However, studies show that negative emotions can harm the body. Anger can also have harmful effects on health. When you see red, your blood pressure is raised and you can suffer from headaches, sleep problems and digestive problems.

However, what about positive feelings and attitudes? Until recently, scientists had not investigated whether there is a link between positive feelings and good health.

Then, in a study that had followed more than 6,000 men and women aged 25 to 74 for 20 years, researchers found that positivity reduced the risk of heart disease. Other factors influencing health included a supportive network of family and friends, and an optimistic outlook on life. The research showed that children who were more able to stay focused on a task, and <u>who</u> had a more positive attitude to life at age seven, were usually in better health 30 years later. The study has been controversial. Some health professionals believe that bad lifestyle choices, such as smoking or lack of exercise, are the reason for heart disease and other illnesses, and not an individual's attitude. The researchers, while agreeing, raise the question: why are people making bad lifestyle decisions? Do more optimistic people make better and healthier lifestyle choices?

1. There are many possible effects on someone's health if he gets angry. Write down

Questions : (40 points)

	three of these possible effects.	(9 points)
2.	There are many factors that could influence health. Write down two.	(6 points)
3.	What does the underlined word " who" in the text refer to?	(5 points)
4.	Find the colour idiom in the text which means " to feel angry".	(5 points)
5.	Quote the sentence which shows that there is no link between positive good health.	(5 points)
6.	Children were in better health thirty years later for two reasons. Wr reasons down.	ite these two (4 points)
7.	You can avoid getting angry by following many procedures. Think of t and in two sentences write down your point of view.	his statement (6 points)

² Health conditions in Jordan are among the best in the Middle East. This is largely due to the country's commitment to making healthcare for all a top priority. Advances in education, economic conditions, sanitation, clean water, diet and housing have made our community healthier.

As a result of careful planning, the number of healthcare services has been increasing rapidly over the past years. More than 800 different kinds of healthcare centres have been built, as well as 188 dental clinics. In 2014 CE, 98 per cent of Jordanian children were fully immunised, thanks to immunisation teams that had been working towards this goal for several years.

Although there were remote areas of the country where people had been without consistent access to electricity and safe water, almost 99 per cent of the country's population now has access.

Although the country has been focusing mainly on improving <u>its</u> primary healthcare facilities, it has not neglected its advanced medical facilities. The reputation of Jordanian doctors has spread in the region, and now many more patients come to Jordan for open heart surgery. In Jordan, the open heart surgery programme started in 1970 CE in Amman.

The life expectancy figures show that Jordan's healthcare system is successful. In 1965 CE, the average Jordanian's life expectancy was age 50. In 2017 CE, this average life expectancy had risen to 74.6. According to UNICEF statistics, between 1981 CE and 1991 CE, Jordan's infant mortality rates declined more rapidly than anywhere else in the world – from 70 deaths per 1,000 births in 1981 CE to only 15 deaths per 1,000 births in 2017 CE.

Questions (40 points)

1.	of these factors.	(8 points)
2.	Quote the sentence which shows the year for the first open heart surger in Jordan.	•
3.	Find a word in the text which means " relating to teeth" .	(5 points)
4.	What does the underlined word " its" in the text refer to ?	(5 points)
5.	The life expectancy figures show that Jordan's healthcare system is succes down two pieces of evidence from the text.	(8 points)
6.	The number of healthcare services has been increasing rapidly over the Write down two examples.	-
7.	Health is an important factor in developing any country. Think of this sta then in two sentences, write down your point of view.	(6 points)
		·

Ten-year-old Adeeb al-Balooshi, from Dubai, is going to travel to seven countries on a tour which has been organised and funded by Sheikh Hamdan bin Mohammad, Crown Prince of Dubai. The boy caught Sheikh Hamdan's attention with his invention – a prosthetic limb for his father. The Sheikh has taken a special interest in the boy, and hopes the tour that he is sponsoring for Adeeb will give the young inventor more self-confidence and inspire other young Emirati inventors.

Adeeb got the idea for a special kind of prosthetic leg while he was at the beach with his family. His father, who wears an artificial leg, could not swim in the sea as he could not risk getting his leg wet. This inspired Adeeb to invent a waterproof prosthetic leg. Adeeb is going to visit the USA, France, the UK, Ireland, Belgium, Italy and Germany, <u>where</u> he will be staying with relatives. However, while he is in Germany, Adeeb will not be spending all his time sightseeing. He will be working with a specialist doctor to build the appendage. He will also be attending a course on prosthetics and learning about different kinds of medical apparatus.

Adeeb has invented several other devices, including a tiny cleaning robot and a heart monitor, which is attached to a car seat belt. In the case of an emergency, rescue services and the driver's family will be automatically connected with the driver through this special checking device. He has also invented a fireproof helmet. This special equipment, which has a built-in camera system, will help rescue workers in emergencies.

It is for these reasons that Adeeb rightly deserves his reputation as one of the youngest inventors in the world.

Questions

The Sheik Hamdan has sponsored the tour for Adeeb for two reasons. V two reasons down.					
Adeeb is going to visit many countries in his tour. Write down four .	-				
Write down the sentence which shows that Adeeb is the youngest involved .	(5 points)				
Find the word which means " provide protection against water."	•				
Adeeb's father faced two difficulties with his prosthetic leg. Write difficulties down.	(4 points)				
Encouraging young inventors is a responsibility that any government s support them.	hould do to (6 points)				
What does the underlined word " where " in the text refer to?	(5 points)				
	Adeeb is going to visit many countries in his tour. Write down four . Write down the sentence which shows that Adeeb is the youngest invo world . Find the word which means " provide protection against water." Adeeb's father faced two difficulties with his prosthetic leg. Write difficulties down. Encouraging young inventors is a responsibility that any government s support them.				

Studio schools are pioneering schools which receive funding as well as support from private businesses, and which seek to encourage young people to undertake a less conventional form of secondary education.

These schools often specialise in one specific area, whilst understanding that the same broad range of skills and qualifications should be made available to all young people.

One such school has recently opened to educate fourteen- to eighteen year- olds who have a special interest in working in the space industry.

Students follow a tailor-made curriculum at the school, including subjects such as Astronomy and Astrophysics.

Lessons are a mixture of small-class tutorials, with projects supervised by leading companies in both the space and technology industries.

Prominent scientists and engineers are brought in as guest lecturers, with students aiming to achieve top grades in their Maths and Science exams. When <u>they</u> leave school, they will be well-placed to take any number of different career paths. 'They don't have to become astronauts!'

says a spokesperson for the school. 'Excellent grades in science and technology subjects can open many doors and lead to a variety of career opportunities.'

Questions

2.	The leading companies which supervised the project are specialised in t areas. Write these two areas down.	(6 points)
3.	What does the underlined word "they" in the text refer to?	(5 points
4.	Find a word in the text which means " the study of the chemical structur stars and the forces that influence them" .	re of the (5 points)
5.	Quote the sentence which shows that excellent grades can open many do students at space schools.	ors before (5 points)
6.	The private sector helps the space schools in two ways. Write them.	(6 points)
7.		

Two summers ago, I spent five months studying Arabic at the German-Jordanian University near Madaba. As my father is originally from Jordan, I grew up speaking Arabic as well as German. However, I had never studied Arabic formally, and when the opportunity came up for me to spend a year in Jordan studying Arabic, I didn't hesitate for one moment.

I have relatives in Jordan and they arranged for me to stay with a wonderful family who live just outside Madaba. I was amazed by the number of international students there, who were not only from Germany, but from all over the world. Most of them had studied Arabic to a high level. I'm very familiar with colloquial Arabic, which is what my family speaks and understands.

The Arabic class, in Modern Standard Arabic, was challenging, especially the grammar. Every week, we had to learn a vocabulary list of around 50 words. We covered many topics.

Living with a family helped to improve my Arabic-speaking skills because, while all the students heard Arabic in the classroom and streets, I could also practise it at home. I really put my back into it, and I earned an A on the course.

What impressed me most about students in Jordan was their behaviour and their attitude to studying. All the students who I met appreciated the importance of <u>their</u> university education and the opportunities it would give them to contribute to their country's prosperity. They also showed extremely positive values. Everybody was honest, and people discussed problems rather than getting angry if they disagreed with each other.

As someone who enjoys delicious food, beautiful places and friendly, hospitable people, studying in Jordan was one of the best decisions I have made in my life. I made many new friends. I also improved my Arabic speaking, writing and reading skills. My dream is to be fluent in Arabic one day – and as I intend to return to Jordan as often as I can, I know I'm going to make this dream a reality.

Questions

6

1.	Anita was so willing to study Arabic in Jordan for many reasons.	Write down four
	of these reasons down.	(8 points)

2.	Anita can speak two languages. What are these two languages.	(5 points)
