TEXT 1

THE HISTORY OF COMPUTERS

When you are using a computer, think about the technology that is needed for it to work. People have been using types of computers for thousands of years. A metal machine was found on the seabed in Greece that was more than 2,000 years old. It is believed that **this** was the first ever computer.

In the 1940s, technology had developed enough for inventors to make the first generation of modern computers. One such model was so large it needed a room that was 167 square metres to accommodate it. During that decade, scientists in England developed the first computer program. It took 25 minutes to complete one calculation. In 1958 CE, the computer chip was developed.

The first computer game was produced in 1962 CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers. The first **PC** (personal computer) was produced in 1974CE, so people could buy computers to use at home.

In 1983 CE, people could buy a laptop for the first time. Then, in 1990 CE, the British scientist Tim Berners-Lee developed the World Wide Web. It was not until 2007 CE that the first smartphones appeared. Today, most people use their mobile phones every day. What will happen in the future? You can already buy watches which can do the same as mobile phones. Scientists have also developed glasses that are capable of doing even more than this.

Life in the future is going to see further changes in computer technology. It is likely that all aspects of everyday life will rely on a computer program, from how we travel to how our homes are heated.

Read the following article carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the text.

- 1) Write down the sentence which indicates the place where the first computer was found.
- 2) Quote the sentence which means that the first modern computers were very large?
- 3) There are many aspects of everyday life will depend on a computer program. Mention two of them.
- 4) Write down the sentence which shows the time in which the first computer program took to complete one calculation?

- 5) There are many inventions were completed between 1958 CE and 1974CE. Mention two of them.
- 6) There are many inventions that were developed between 1974 CE and 2007CE. Write down two of them.
- 7) Quote the sentence which indicates that future will witness new developments related to computers.
- 8) Write down the sentence which indicates the reason behind the production of the first personal computer.
- 9) Find a word in the text which means "**a mobile phone that connects to the Internet**".
- 10) What does the underlined word "**PC**" stand for?
- 11) What does the underlined word "**this**" refer to?
- 12) Computer technology will develop further. Think of this statement and, in two sentences, write down your point of view.
- 13) Life without computers wouldn't be easy. Think of this statement and, in two sentences, write down your point of view.
- 14) According to the text, the writer states that the smartphone is an important invention. Suggest three of the advantages of smartphones.
- 15) According to the text, the writer states that smartphone is an important invention. Suggest three of the disadvantages of smartphones.

TEXT 2

Using Technology in Class

Young people love learning, but they like learning even more if they are presented with information in an interesting and challenging way. Today, I am going to give a talk about how you can use technology in Jordanian classrooms.

Here are some ideas:

Many classrooms now use a whiteboard as a computer screen. As consequence, teachers can show websites on the board in front of the class. Teachers can then use the Internet to show educational programs, play educational games, music, recordings of languages, and so on.

In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do tasks such as showing photographs, researching information, recording interviews and creating diagrams. Tablets are ideal for pair and group work.

Teachers can perhaps ask their students to start writing a blog (an online diary), either about their own lives or as if they were someone famous. They can also create a website for the classroom. Students can contribute to the website, so for example they can post work, photos and messages.

Most young people communicate through social media, by which they send each other photos and messages via the Internet. Some students like to send messages that are under 140 letters for anyone to read. Teachers can ask students to summarise information about what they have learnt in class in the same way. If students learn to summarise quickly, they will be able to use this skill in future.

We all like to send emails, don't we? Email exchanges are very useful in the classroom. Teachers can ask students to email what **they** have learnt to students of a similar age at another school. They could even email students in another country. As a result, students can then share information and help each other with tasks.

Another way of communicating with other schools is through talking to people over the computer. Most computers have cameras, so you can also see the people you are talking to. In this way, students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to them. You can also use this system to invite guest speakers to give talks over a computer. For example, scientists or teachers from another country could give a lesson to the class. If you had this type of lesson, the students would be very excited.

Students often use computers at home if they have them. Students can use social media on their computers to help them with their studies, including asking other students to check and compare their work, asking questions or sharing ideas. The teacher must be part of the group, too, to monitor what is happening. Thank you for listening. Does anyone have any questions?

Read the following talk (informal presentation) carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the text.

- 1) Young people like learning more if the information is presented in a way which has some qualities. Mention two of these qualities.
- 2) Teachers can use the Internet inside the classroom for many purposes. Mention two of them.
- 3) Students can use the tablets to do different tasks. Write down two of these tasks.
- 4) Write down the sentence which identifies the blog.
- 5) Tablets are ideal for two types of work. Mention them.
- 6) Students can use the blog to write about different topics. Mention two of these.
- 7) Students can contribute to the website by posting things. Write down three of them.
- 8) While communicating through social media, students send each other many things via the Internet. Mention two of these.
- 9) Students can email what they have learnt to two groups of students. Write them down.
- 10) There are many ways to communicate with other schools. Write down two of these ways.
- 11) Students can use email exchanges as an educational tool in many different ways. Mention two of these.
- 12) There are many advantages of using social media in studying. Mention two of them.
- 13) Quote the sentence which indicates that students prefer the exciting ways of learning.
- 14) We can invite guest speakers to give talks over a computer. Mention two groups of those speakers.
- 15) Write down the sentence which indicates that social media is used widely among young people.
- 16) Write down the sentence which acts as an introduction.
- 17) Write down the sentence which tells you what the talk is going to be about.
- 18) Write down the sentences which indicate a way to end the talk.
- 19) Find a word in the text which means "a regularly updated personal website or web page, usually written in an informal style".
- 20) Find a word in the text which means "to put a message or document on the Internet so that other people can see it".
- 21) What does the underlined word "**they**" refer to?
- 22) Computers will replace books one day. How far do you agree with this statement?
- 23) Families start heavily to rely on modern technology. Think of this statement and, in two sentences, write down your point of view.
- 24) According to the text, the writer states that digital information can be used to educate people. Suggest three of the ways that you can use digital information in your classroom.
- 25) "Technology is just a tool. In terms of getting the kids working together and motivating them, the teacher is the most important." How far do you agree with this quotation?

TEXT 3

The Internet of Things

Everyone knows that the Internet connects people, but now it does more than that-it connects objects, too. These days, computers often communicate with each other; for example, your TV automatically downloads your favourite TV show, or your "sat nav" system tells you where you are. This is known as the "Internet of Things", and there's a lot more to come.

In just a few years' time, experts say that billions of machines will be connected to each other and to the Internet. As a consequence, computers will increasingly run our lives for us. For example, your fridge will know when you need more milk and add it to your online shopping list; your windows will close if it likely to rain; your watch will record your heart rate and email your doctor; and your sofa will tell you when you need to stand up and get some exercise!

Many people are excited about the "Internet of Things". For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings. The dream could easily become a nightmare!

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the text.

- 1) Computers often communicate with each other. Mention two examples.
- 2) Many people think that using the "Internet of Things" will characterise their lives with many qualities. Write down two.
- 3) There are many examples of Internet of Things ' in the text. Give two of them.
- 4) There are many examples of how our computers will increasingly run our lives for us. Write down two of them.
- 5) Quote the sentence which indicates that the Internet will connect machines together shortly.
- 6) Write down the sentence which indicates that people are happy with the "Internet of Things".
- 7) Other people with a different opinion want to keep control of things which belong to them. Mention two of these things.
- 8) Write down the words which shows that the 'Internet of Things' can help you to keep fit.
- 9) Find a word in the first paragraph which has the same meaning as 'speak to'.
- 10) Find a word in the text which means "to find information".
- 11) What does the underlined word "them", in the first line, refer to?

12) Some people think that the 'Internet of Things' is worrying. Think of this statement and, in two sentences, write down your point of view.

TYPE TWO

For items (1-30), read the following texts carefully, and then choose the correct option from A, B, C or D to complete the following sentences.

Young people love learning, but they like learning even more if they are presented with information in an interesting and challenging way. Today, I am going to give a talk about how you can use technology in Jordanian classrooms.

1) If young people are given the information in an interesting way, they

A) will love learning more.

B) will be challenged more.

C) will be interested more.

D) can use technology.

The first computer game was produced in 1962 CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers. The first PC (personal computer) was produced in 1974CE, so people could buy computers to use at home.

2) There are many inventions were developed in the 1960s related to computer. Two of them are

A) the computer mouse and the floppy disk.

B) the first computer game and the floppy disk.

C) the first computer game and the computer mouse.

D) the floppy disk and The first PC.

Many people are excited about the "Internet of Things". For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings. The dream could easily become a nightmare!

3) There are many ways which hackers use to violate people's privacy. Two of them are

- A) Hackers can control of their own lives and access people's security settings.
- B) Hackers can access people's passwords and control their own things.
- C) Hackers can keep control of people's own lives and their own things.
- D) Hackers can access people's passwords and security settings.

We all like to send emails, don't we? Email exchanges are very useful in the classroom. Teachers can ask students to email what they have learnt to students of a similar age at another school. They could even email students in another country. As a result, students can then share information and help each other with tasks. Another way of communicating with other schools is through talking to people over the computer.

4) There are two ideas mentioned in the text used to communicate with other schools. These two are

- A) email exchanges and talking to people over the computer.
- B) talking to people over the computer and asking students to email what they have learnt to students at another school.
- C) email exchanges and sharing information.
- D) asking students to email what they have learnt to students at another school and sharing information.

In just a few years' time, experts say that billions of machines will be connected to each other and to the Internet. As a consequence, computers will increasingly run our lives for us. For example, your fridge will know when you need more milk and add it to your online shopping list; your windows will close if it likely to rain; your watch will record your heart rate and email your doctor; and your sofa will tell you when you need to stand up and get some exercise!

5) According to the text, one of the ways that the 'Internet of Things' will help you to keep fit is that.....

- A) the sofa will tell you when to get some exercise.
- B) computers will increasingly run our lives for us.
- C) your fridge will know when you need more milk.
- D) your watch will record your heart rate.

In this way, students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to them. You can also use this system to invite guest speakers to give talks over a computer. For example, scientists or teachers from another country could give a lesson to the class. If you had this type of lesson, the students would be very excited.

6) The underlined words refer to

- A) speaking to students in England.
- B) studying English in Jordan.
- C) giving a lesson to the class by scientists or teachers from another country.
- D) inviting guest speakers.

Life in the future is going to see further changes in computer technology. It is likely that all aspects of everyday life will rely on a computer program, from how we travel to how our homes are heated.

7) The text indicates that

- A) heating homes will depend on technology.
- B) there will not be any changes in the future.
- C) computer may run our future life.
- D) travelling will depend on computers.

Everyone knows that the Internet connects people, but now it does more than that-it connects objects, too. These days, computers often communicate with each other; for example, your TV automatically downloads your favourite TV show, or your "sat nav" system tells you where you are. This is known as the "Internet of Things", and there's a lot more to come.

8) is known as the "Internet of Things".

- A) Connecting people.
- B) Downloading our favourite TV shows.
- C) Telling us where we are.
- D) Communicating computers with each other.

The first computer game was produced in 1962 CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers.

9) The first computer mouse was produced in CE.

- A) 1962
- B) 1971
- C) 1964
- D) 1966

Another way of communicating with other schools is through talking to people over the computer. Most computers have cameras, so you can also see the people you are talking to. In this way, students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to them.

10) The underlined words refer to

- A) talking to people.
- B) communicating with other schools.
- C) seeing the people you are talking to.
- D) studying English.

When you are using a computer, think about the technology that is needed for it to work. People have been using types of computers for thousands of years. A metal machine was found on the seabed in Greece that was more than 2,000 years old. It is believed that this was the first ever computer.

11) The first ever computer was

- A) less than 2,000 years old
- B) more than 2,000 years old
- C) 2,000 years old
- D) 3,000 years old

Many people are excited about the "Internet of Things". For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings. The dream could easily become a nightmare!

12) The best heading for this text is:

- A) What is the 'Internet of Things'?
- B) An unknown future
- C) An easy life!
- D) The dream.

Another way of communicating with other schools is through talking to people over the computer. Most computers have cameras, so you can also see the people you are talking to. In this way, students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to them. You can also use this system to invite guest speakers to give talks over a computer. For example, scientists or teachers from another country could give a lesson to the class. If you had this type of lesson, the students would be very excited.

13) You can invite guest speakers to give talks through.....

- A) talking to people over the computer.
- B) giving a lesson to the class.
- C) seeing what students in England are doing.
- D) communicating with other schools.

Most young people communicate through social media, by which they send each other photos and messages via the Internet. Some students like to send messages that are under 140 letters for anyone to read. Teachers can ask students to summarise information about what they have learnt in class in the same way.

14) The underlined words relate to

- A) summarising information about what they have learnt in class.
- B) communicating through social media.
- C) sending each other photos via the Internet.
- D) sending messages that are under 140 letters for anyone to read.

The first computer game was produced in 1962 CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers. The first PC (personal computer) was produced in 1974CE, so people could buy computers to use at home.

15) The floppy disk was invented.....

- A) to share information.
- B) so people could buy computers to use at home.
- C) to produce the first PC.
- D) to produce the first computer game.

Many people are excited about the "Internet of Things". For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings. The dream could easily become a nightmare!

16) The word in the text which means to find information, especially on a computer is

- A) keep
- B) access
- C) happen
- D) nightmare

In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do many tasks. These tasks include showing photographs, researching information, recording interviews and creating diagrams. Tablets are ideal for pair and group work.

17) The sentence which indicates that tablet computers are not available for all students is

- A) These tasks include showing photographs, researching information, recording interviews and creating diagrams.
- B) Tablets are ideal for pair and group work.
- C) Therefore, students can use the tablets to do many tasks.
- D) In some countries, tablet computers are available for students to use in class.

In the 1940s, technology had developed enough for inventors to make the first generation of modern computers. One such model was so large it needed a room that was 167 square metres to accommodate it. During that decade, scientists in England developed the first computer program. **It** took 25 minutes to complete one calculation. In 1958 CE, the computer chip was developed.

18) The underlined word "It" refer to.....

- A) England. B) The first computer program.
C) Completing one calculation. D) The computer chip.

In the 1940s, technology had developed enough for inventors to make the first generation of modern computers. One such model was so large it needed a room that was 167 square metres to accommodate it. During **that decade**, scientists in England developed the first computer program.

19) The underlined words refer to.....

- A) 167 square metres B) in the 1940 C) decade D) the 1940s

In just a few years' time, experts say that billions of machines will be connected to each other and to the Internet. As a consequence, computers will increasingly run our lives for us.

20) The best heading for this text is:

- A) An unknown future B) Worrying life! C) The Internet! D) An easy life!

The first computer game was produced in 1962 CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers.

21) People could share information between computers when inventors invented the

- A) floppy disk B) computers C) the computer mouse D) first computer game

Many classrooms now use a whiteboard as a computer screen. As consequence, teachers can show websites on the board in front of the class. Teachers can then use the Internet to show educational programs, play educational games, music, recordings of languages, and so on.

22) The whiteboard can be used.....

- A) to show educational programs B) as music
C) as a computer screen D) instead of the Internet

In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do tasks such as showing photographs, researching information, recording interviews and creating diagrams. Tablets are ideal for pair and group work.

23) Tablets are perfect forwork.

- A) group B) tasks C) interviews D) photographs

In the 1940s, technology had developed enough for inventors to make the first generation of modern computers. One such model was so large it needed a room that was 167 square metres to accommodate it. During that decade, scientists in England developed the first computer program. It took 25 minutes to complete one calculation. In 1958 CE, the computer chip was developed.

24) Inventors have made the first generation of modern computers in the 1940s because....

- A) one such model was so large.
B) technology had developed enough.
C) he first computer program.
D) in 1958 CE, the computer chip was developed.

Most young people communicate through social media, by which they send each other photos and messages via the Internet. Some students like to send messages that are under 140 letters for anyone to read. Teachers can ask students to summarise information about what they have learnt in class in the same way. If students learn to summarise quickly, they will be able to use this skill in future.

25) The underlined words refer to

- A) sending messages that are under 140 letters for anyone to read.
B) summarising quickly
C) communicating through social media.
D) sending each other photos via the Internet.

Many people are excited about the "Internet of Things". For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings. The dream could easily become a nightmare!

26) The dream of "Internet of Things" could easily become a nightmare if

- A) people want to keep control of their own lives and their own things.
B) hackers violate your privacy or security settings.
C) people's lives will be easier and more comfortable
D) people are not so sure.

Another way of communicating with other schools is through talking to people over the computer. Most computers have cameras, so you can also see the people you are talking to. In this way, students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to them. You can also use this system to invite guest speakers to give talks over a computer.

27) The underlined words refer to

- A) seeing what students in England are doing.
- B) talking to people over the computer.
- C) communicating with other schools.
- D) inviting guest speakers to give talks over a computer.

Most young people communicate through social media, by which they send each other photos and messages via the Internet. Some students like to send messages that are under 140 letters for anyone to read. Teachers can ask students to summarise information about what they have learnt in class in the same way. If students learn to summarise quickly, they will be able to use this skill in future.

28) Teachers can ask students to summarise information about what they have learnt in class

- A) by summarising quickly
- B) by using this skill in future
- C) by communicating through social media
- D) in the same way they send messages.

The first computer game was produced in 1962 CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers. The first PC (personal computer) was produced in 1974CE, so people could buy computers to use at home.

29) According to the text, the function of the floppy disk is

- A) to share the first computer game.
- B) to buy computers.
- C) to share information between computers.
- D) to use computers at home.

Young people love learning, but they like learning even more if they are presented with information in an interesting and challenging way. Today, I am going to give a talk about how you can use technology in Jordanian classrooms.

30) The underlined word “a talk” is:

- A) report
- B) article
- C) informal presentation
- D) essay

Vocabulary

For questions (1- 23), choose the correct option from A, B, C OR D to complete the following sentence.

1) It's very important to know where to find your settings.

- A) filter B) security C) email D) gravity

2) The bridge was built a ago.

- A) blog B) calculation C) gravity D) decade

3) You can create your own website.

What does the underlined word "create" mean?

- A) construct B) offer C) give D) use

4) We would useto record interviews with people.

- A) email exchange B) social media C) tablet computer D) whiteboard

5)I am going tomore pictures tomorrow.

- A) filter B) post C) invent D) develop

6) is what keeps everything from floating around.

- A) Generation B) Programme C) Decade D) Gravity

7) Some problems may be related to anxieties about getting viruses or becoming a victim of

- A) identity fraud B) floppy disk C) privacy settings D) security settings

8) Throughout life, we small groups of people for admiration and respect.

- A) invent B) access C) rely on D) filter

9) Laboratory test of a computer or of software code may be necessary to confirm technical feasibility.

- A) blog B) chip C) generation D) mouse

10) The program that checks whether certain content on a web page should be displayed to the viewer is called

- A) an access B)a filter C) a website D) a model

11)means you know what is happening and you are following the developments.

- A) Find out what is happening. B) Presenting information.
C) Monitor what is happening. C) Contribute to a website.

12) are controls available on social networking sites which let you decide who can see what information.

- A) Access B) Security settings C) Filters D) Privacy settings

13) In 2010, Apple finally rolled out its first real – the iPad – across several countries.

- A) chip B) tablet computer C) blog D) whiteboard

14)means you have prepared a speech and you are giving this speech to a group of people who are expecting it.

- A) Talking to people B) Presenting information
C) Giving a talk to people D) Sharing ideas

15) How much data can you store on a.....?

- A) mouse B) floppy disk C) program D) blog

16)are controls available on social networking sites which let you decide who can see what information.

- A) Privacy settings B) Security settings C) Filters D) Access

17) The researchers tested a computerthat has the size of a postage stamp.

- A) mouse B) blog C) model D) chip

18) We us theto watch educational programmes in class.

- A) tablet computer B) email exchange C) whiteboard D) blog

19)is used to share information with students in another country.

- A) Tablet computer B) Email exchange C) Whiteboard D) Social media

20) The doctor observes the of the child.

- A) develop B) development C) developed D) developing

21) Can't you a better excuse than that?

- A) invent B) inventor C) invention D) invented

22) Many smaller villages are only by bus.

- A) accessibility B) accessible C) accessibly D) access

23) The radio was invented in the1890s and its was Marconi .

- A) invent B) inventor C) invention D) invented

Grammar

Part One

For items (1- 50), choose the correct option from A, B, C OR D to complete the following sentence.

1) I felt a little better after I the medicine.

- A) will take B) had taken C) have taken D) has taken

2) We..... the course since yesterday.

- A) are going to start B) didn't start C) have started D) has started

3) Have you ever Mansaf before?

- A) have B) has C) had D) having

4) My father said that the workers a meeting then.

- A) were attending B) are attending C) was attending D) will attend

5) I have been waiting here7o'clock.

- A) on B) since C) in D) at

6) I hopethe work soon.

- A) will finish B) to finishing C) finishing D) to finish

7) When I was young, Ifootball every week.

- A) played B) were playing C) play D) plays

8) Inever a lion before I visited a zoo.

- A) has/ seen B) didn't/ see C) had/ seen D) doesn't/ see

9) My phone stopped I need to fix it.

- A) to work B) work C) to working D) working

10) The food on the table looks delicious; shesince the morning.

- A) have been cooking B) has cooked C) cooked D) had been cooking

11) Two matches by our team so far.

- A) have been won B) have won C) won D) has been winning

12) My brother passed the exam without studying. It be easy.

- A) can't B) must C) could D) might

13) a computer at work?

- A) Do you use B) Did you used C) Is you using D) Have you using

14) I French for three years.

- A) am learning B) has learnt C) had been learning D) have been learning

15) Yaser's new bike100 JD.

- A) are costing B) cost C) costs D) is cost

16) She all her homework, so she can relax this evening.

- A) do B) has done C) is doing D) have done

- A) had B) to have C) having D) have

50) We've stopped plastic bags in supermarkets.

- A) to use B) used C) using D) to using

Part Two

For items (1- 20), choose the correct sentence from A, B, C OR D which has a similar meaning to the one above.

1) I am planning to finish my higher education in Jordan.

- A) I need to finish my higher education in Jordan.
- B) I intend to finish my higher education in Jordan.
- C) I intend finishing my higher education in Jordan.
- D) I will finish my higher education in Jordan.

2) "I'll meet you here tomorrow."

- A) She said that she would meet me there the following day.
- B) She said that she will meet me there the following day.
- C) She said that she would meet him there the following day.
- D) She said that she would meet you there the following day.

3) They didn't save some of the historical sites.

- A) Some of the historical sites didn't saved.
- B) Some of the historical sites hadn't been saved.
- C) Some of the historical sites aren't saved.
- D) Some of the historical sites weren't saved.

4) I don't intend to stay here for a long time.

- A) I was not planning to stay here for a long time.
- B) I am not planning to stay here for a long time.
- C) I am not planning staying here for a long time.
- D) I plan to stay here for a long time.

5) "I will give you, dear students, the instructions for the new task."

- A) The teacher said that he will give students the instructions for the new task.
- B) The teacher said that he would give students the instructions for the new task.
- C) The teacher said that I would give his students the instructions for the new task.
- D) The teacher said that he would give dear students the instructions for the new task.

6) They started building the house last week. They are still working.

- A) They have built the house since last week.
- B) They had been building the house since last week.
- C) They have been building the house since last week.
- D) They had built the house since last week.

7) I think you shouldn't touch this wire.

- A) If I were you, I wouldn't touch this wire.
- B) If I were you, I don't touch this wire.
- C) If I were you, I didn't touch this wire.
- D) If I was you, I wouldn't touch this wire.

8) He had a bath and then went to bed.

- A) After he had a bath, he went to bed.
- B) Before he had had a bath, he went to bed.
- C) After he had had a bath, he had gone to bed.
- D) After he had had a bath, he went to bed.

9) I asked the doctor to test my eyesight.

- A) I had tested my eyesight.
- B) I have my eyesight tested.
- C) I had my eyesight tested.
- D) I my eyesight had tested.

Do here

10) People bought phones in different colours and different designs.

- A) Phones in different colours and different designs are bought by people.
- B) Phones in different colours and different designs were bought by people.
- C) Phones in different colours and different designs had been bought by people.
- D) Phones in different colours and different designs bought by people.

11) I asked someone to type the documents.

- A) I had the documents typed.
- B) I had the documents type.
- C) I have the documents typed.
- D) I had the documents typing.

12) The two companies will sign the contract tomorrow.

- A) The contract will signed tomorrow.
- B) The contract will sign tomorrow.
- C) The contract will be signed tomorrow.
- D) The contract would be signed tomorrow.

13) Turn the stove on high to make water boil.

- A) If you turn the stove on high, water boil.
- B) If you turns the stove on high, water boils.
- C) If you turned the stove on high, water boils.
- D) If you turn the stove on high, water boils.

14) They have already hired the new manager.

- A) The new manager have already been hired.
- B) The new manager has already been hired.
- C) The new manager had already been hired.
- D) The new manager has already be hired.

15) "I took a shower and slept."

- A) Ameen said that he had taken a shower and slept.
- B) Ameen said that I had taken a shower and slept.
- C) Ameen said that he had taken a shower and had slept.
- D) Ameen said that he took a shower and slept.

16) "You are clever."

- A) The teacher said that you were clever.
- B) The teacher said that he was clever.
- C) The teacher said that I was clever.
- D) The teacher said that I were clever.

17) I think you should practice more.

- A) If I were you, I will practice more.
- B) If I was you, I would practice more.
- C) If I were you, I would practiced more.
- D) If I were you, I would practice more.

18) "There will be a growth in the number smartphones next year."

- A) Experts said that there would be a growth in the number smartphones next year.
- B) Experts said that there would been a growth in the number smartphones the following year.
- C) Experts said that there would be a growth in the number smartphones the following year.
- D) Experts say that there would be a growth in the number smartphones in the future.

. 19) My mother closed the window and then it rained.

- A) My mother had closed the window after it rained.
- B) My mother had closed the window before it rained.
- C) My mother closed the window before it had rained.
- D) After my mother had closed the window, it had rained.

20) They started searching for a treatment to the disease two years ago. They are still searching.

- A) They have searched for a treatment to the disease for two years.
- B) They had been searching for a treatment to the disease for two years.
- C) They have been searching for a treatment to the disease for two years.
- D) They had searched for a treatment to the disease for two years.

Part Three

For questions (1- 20), complete each of the following items so that the new item has a similar meaning to the one before it.

1) The two kings are signing the treaty.

The treaty

2) "He works in a bank."

Sami said

3) He started eating dinner at 8 p.m. It's 08:30 p.m. and he's still eating.

Hesince 8 p.m.

4) A forest fire destroyed the whole suburb.

The whole suburb

5) "We went out last night."

My brother said.....

6) Press the shutter button half way to make the focus work.

If you.....

7) The director will give you instructions.

Instructions

8) I've been making a cake since the morning and I need more time to finish.

Isince the morning.

9) "You were waiting for the bus when I arrived."

Maha told her father

10) They make many cars in Japan.

Many

11) "She didn't go to the party. She was sick."

Maram said

12) I asked someone to fix the washing machine.

I

13) She started doing her homework at 3p.m. and she is sleeping now.

Shesince 3 p.m.

14) The secretary is sending the document right now.

The document

15) "You haven't eaten your breakfast."

Lana said.....

16) The two companies will sign the contract tomorrow.

The contract

17) "They don't like chocolate."

My mother said

18) They had hired the new manager before John left the company.

The new

19) "I won't see you tomorrow, Nadia."

Rama said

20) The secretary is sending the document right now.

The document

Writing

For items (1- 11), choose the correct option from A, B, C OR D.

1) software system can create and save new documents

- A) Whitboard B) Whiteboarded C) Whiteboard D) Whiteboard

2) The software enables you to the Internet in seconds.

- A) acess B) access C) acces D) access

3) had lived / for six years/. /in Amman /He said that/ he

The sentence that has the correct order of the words and phrases above is:

- A) He said that he had living in Amman for six years.
B) He had lived He said that he had lived in Amman for six years.
C) He said that for six years he in Amman had lived.
D) He said that he had lived in Amman for six years.

4) A criminal to access their passwords and security last week.

- A) manages / settings B) managed/ settings C) manages / setings D) managed / setings

5) Thecan beto the Internet to be used in class.

- A) Whiteboard/ connected B) Whiteboard/ conected
C) Whiteboard/ connected D) Whiteboard/ connected

6) The sentence that has been written correctly is:

- A) People have been using smartphones since they were invented.
B) People have been using since they smartphones were invented.
C) People have been using were they invented since smartphones.
D) People using have been since they were invented smartphones.

7) The sentence that has been written correctly is:

- A) He said that many computers stopped people seeing certain websites which had filters.
- B) He said that seeing certain websites had filters many computers which stopped people.
- C) He said that many computers had filters which stopped people seeing certain websites.
- D) He said that filters had many computers which stopped people seeing certain websites.

8) In this way, technology makes communication more convenient.

The function of using the underlined words in the above sentence is:

- A) expressing opposition
- B) reporting information
- C) expressing introduction
- D) expressing consequence

9) However, social media is time-consuming.

The function of using “However” in the above sentence is:

- A) expressing opposition
- B) reporting information
- C) expressing introduction
- D) expressing consequence

10) The word which expresses opposition is:

- A) as a consequence
- B) Whereas
- C) therefore
- D) in this way

11) The correct punctuated sentence is:

- A) As consequence. teachers can show educational programs: play educational games and music.
- B) As consequence! teachers can show educational programs! play educational games and music.
- C) As consequence, teachers can show educational programs, play educational games and music.
- D) As consequence, teachers can show educational programs; play educational games and music!

[ANSWERS]

Reading Type 1

TEXT 1

- 1) A metal machine was found on the seabed in Greece that was more than 2,000 years old.
- 2) "One such model was so large it needed a room that was 167 square metres to accommodate it."
- 3) 1) How we travel 2) How our homes are heated.
- 4) It took 25 minutes to complete one calculation.
- 5) 1) The computer mouse 2) The first computer game. (The computer mouse and the first computer game.)

READING

TYPE 1

نص عليه اسئلة بالنمط الكتابي

Read the following text carefully, and then answer all the questions that follow. Your answers should be based on the text. (2017)

When you are using a computer, think about the technology that is needed for it to work. People have been using types of computers for thousands of years. A metal machine was found on the seabed in Greece that was more than 2,000 years old. It is believed that this was the first ever computer. In the 1940s, technology had developed enough for inventors to make the first generation of modern computers; one such model was so large that it needed a room that was 167 square meters to accommodate it. During that decade, scientists in England developed the first computer program. It took 25 minutes to complete one calculation. In 1958 CE, the computer chip was developed.

The first computer game was produced in 1962CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers. The first PC (personal computer) was produced in 1974CE, so people could buy computers to use at home. In 1983 CE, people could buy a laptop for the first time. Then, in 1990 CE, the British scientist Tim Berners-Lee developed the World Wide Web. It was not until 2007 CE that the first Smartphone appeared. Today most people used their mobile phones every day. Life will rely on a computer program, from how we travel to how our homes are heated.

- 1- Different inventions were completed between 1958CE – 1964CE. Write down two of these inventions.
- 2- The writer specifies two aspects of everyday life that will depend on technology in the future. Write them down.
- 3- Quote the sentence which shows the impact of inventing the floppy disk.
- 4- Find a word in the text which means “**a set of instructions enabling a computer to function.**”
- 5- What does the underlined word “**this**” refer to?
- 6- Computers have enabled us to do many great things but we are becoming overly reliant on technology. Suggest three negative consequences of depending on technology.
- 7- Some people believe that computers will replace books one day. Think of this statement and, in two sentences, write down your point of view.

For questions (1-7), read the following texts carefully, and then choose the correct answer from A, B, C or D to complete the sentence below each text.

1) The first computer game was produced in 1962 CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented. The first PC (personal computer) was produced in 1974 CE, so people could buy computers to use at home. In 1983 CE, people could buy a laptop for the first time. Then, in 1990 CE, the British scientist Tim Berners-Lee developed the World Wide Web.

It was in that the first computer mouse was produced. (2020)

A) 1962 CE

B) 1974 CE

C) 1964 CE

D) 1971 CE

2) Many people are excited about the "Internet of Things". For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things.

The underlined word (others) indicates that the people who areabout future. (2020)

A) delighted

B) excited

C) worried

D) comfortable

3) Many classrooms now use a whiteboard as a computer screen. As a consequence, teachers can then use the Internet to show educational programmes and play educational games. In some countries, tablet computers are available for students to use in class. Therefore, students can access the tablets to do tasks such as showing photographs, researching information and recording interviews.

-The word which means "to find information, especially on a computer" in the text is..... (2021)

A) show

B) use

C) access

D) play

4) In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers. The first PC (personal computer) was produced in 1974CE, so people could buy computers to use at home. In 1983 CE, people could buy a laptop for the first time. Then, in 1990 CE, the British scientist Tim Berners-Lee developed the World Wide Web.

People weren't able to purchase a laptop before..... 2021)

A) 1990

B) 1971

C) 1974

D) 1983

5) Most young people communicate through social media, by which they send each other photos and messages via the Internet. Some students like to send messages that are under 140 letters for anyone to read. Teachers can ask students to summarise information about what they have learnt in class in the same way. If students learn to summarise quickly, they will be able to use this skill in future.

Students will make use of summarising skill in the future if they: (2021)

- A) learn to summarise information rapidly B) learn to send information quickly
C) learn to summarise quietly D) communicate through social media rapidly

6) In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do tasks such as showing photographs, researching information, recording interviews and creating diagrams. Tablets are ideal for pair and group work. Teachers can perhaps ask their students to start writing an online diary, either about their own lives or as if they were someone famous.

The underlined phrase in the text above can be replaced by..... (2022)

- A) access B) blog C) pogrom D) calculation

7) Many people are excited about the "Internet of Things". For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings. The dream could easily become a nightmare!

The underlined linking word in the text above indicates (2022)

- A) opposition B) consequence C) addition D) cause

VOCABULARY
