The concept of a megaproject is always based on the benefits it brings to a community. However, many megaprojects have been criticised because of their negative effects on a community or the environment. An example of megaprojects is Masdar City, which began its development in 2006 CE in Abu Dhabi. Masdar City will be the world's first carbon-neutral, zero-waste artificially-created city.

The city will run entirely on renewable energy sources. It is built on an advanced energy grid which monitors exactly how much electricity is being used by every outlet in the complex. Furthermore, in order to reduce its carbon footprint, Masdar City will be a car-free zone, designed to be pedestrian and cycle-friendly. Electric, driverless cars will operate as public transport vehicles, and the city will be connected to other locations by a network of roads and railways.

Energy will be provided by solar power and wind farms, and there are also plans to build the world's largest hydrogen plant. A desalination plant will be used to provide the city's water, with 80% of water used being recycled. Biological waste will be used as an energy source too, and industrial waste will be recycled. The current residents of Masdar City are all students at the Masdar Institute of Science and Technology, a university whose students are fully committed to finding solutions to the world's energy problems.

Business Studies is a popular choice for students who are choosing a degree course in the UK. After graduating, some go on to further study, but most of them take up employment. Many large companies offer graduate training schemes, which are a kind of apprenticeship. We went to meet twenty-two-year-old Ricky Miles, who is about to graduate in the subject. Ricky has been studying Business Studies, which is a four-year course, including two periods of work experience. Each one lasted six months, but they weren't in the same year. Besides Business Studies, Ricky has studied Maths, Accounting, Finance, Economics, Marketing and Sales over those four years. He also did a course in Management, which is about recruiting and managing staff.

Ricky most enjoyed the work experience. He learnt so much, both times, and of course it looks great on his curriculum vitae. One of the companies offered him paid work last summer, so he managed to get even more experience that way.

Ricky has just applied for a job with a bank. He has the right qualifications, but he knows there will be a lot of other applicants. He'll just have to wait and see if he gets an interview. If he does, he'll have to prepare really carefully.

1. The text states many subjects that graduate students may study at university. Write down three of them. (6 points)
2. What do most of students do after graduating? (6 points)
3. What is the name of Ricky's degree? (4 points)
