Exam's Topic: Unit One and Two

Time: 60 minutes

Teacher's Name: Ahmad Alshatti Total Marks: 70

Phone Number: 0791943248

Student's Name:

Read the following article(s) carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the article. (20 points)

Text One (10 points)

Health conditions in Jordan are among the best in the Middle East. This is largely due to the country's commitment to making healthcare for all a top priority. As a result of careful planning, the number of healthcare services has been increasing rapidly over the past years. More than 800 different kinds of healthcare centers have been built, as well as 188 dental clinics. In 2012 CE, 98 per cent of Jordanian children were fully immunized, thanks to immunization teams that had been working towards this goal for several years. The reputation of Jordanian doctors has spread in the region, and now many more patients come to Jordan for open heart surgery. In Jordan, the open heart surgery program started in 1970 CE in Amman. The life expectancy figures show that Jordan's healthcare system is successful. In 1965 CE, the average Jordanian's life expectancy was age 50. In 2017 CE, this average life expectancy had risen to 74.6. According to UNICEF statistics, between 1981 CE and 1991 CE, Jordan's infant mortality rates declined more rapidly than anywhere else in the world – from 70 deaths per 1,000 births in 1981 CE to only 15 deaths per 1,000 births in 2017 CE

Question Number One:

- 1- In the period 1970-1991, there were many developments in the Jordanian health services, mention two of those developments.
- 2- The health conditions in Jordan are the best among the Middle East, mention the reason.
- 3- There are many examples showing the increase in the number of health services in Jordan, mention two of them.
- 4- According to the text, what do the average age figures show?
- 5- Quote the sentence that indicates that the good reputation of Jordanian doctors has spread widely in the Middle East.

Text Two: (10 points)

In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do tasks such as showing photographs, researching information, recording interviews and creating diagrams. Teachers can perhaps ask their students to start writing a blog. Either about their own lives or as if they were someone famous. They can also create a website, so for examples they can post work, photos and messages. We all like to send emails, don't we? Emails exchanges are very useful in the classroom. Teachers can ask students to email what they have learnt to students of a similar age at another school. They could even email students in another country. As a result, students can then share information and help each other with tasks. Most computers have cameras, so you can also see the people you are talking to. In this way students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to **them**. You can also use this system to invite guest speakers to give talks over a computer. For examples, scientist or teachers from another country could give a lesson to the class. If you had this type of lesson, the students would be very excited.

Question Number Two:

- 1- Mentioned in the text that there are many computers that have a camera to talk to others, write it down.
- 2- According to the text, mentioned that students can use tablets to perform many tasks, mention two of those tasks.
- 3- Quote a sentence that shows that the exchange of emails between students is very important.
- 4- Find a word in the text which means (a regularly updated personal website or web page, usually written in an informal style)
- 5- What does the underlined pronoun (**them**) refer to?
