

Read the following article(s) carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the article. (40 points)

Text One (20 points)

Teachers can perhaps ask their students to start writing a blog, either about their own lives or as if they were someone famous. They can also create a website for the classroom. Students can contribute to the website, so for example they can post work, photos and messages. We all like to send emails, don't we? Email exchanges are very useful in the classroom. Teachers can ask students to email what they have learnt to students of a similar age at another school. **They** could even email students in another country. As a result, students can then share information and help each other with tasks. Another way of communicating with other schools is through talking to people over the computer. Most computers have cameras, so you can also see the people you are talking to. In this way, students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to them. You can also use this system to invite guest speakers to give talk over a computer. For example, scientists or teachers from another country could give a lesson to the class if you had this type of lesson, the students would be very excited. Students often use computers at home if they have them. Students can use social media on their computers to help them with their studies, including asking other students to check and compare their work, asking questions or sharing ideas. The teacher must be part of the group, too, to monitor what is happening.

Question Number One

- 1- Quote the sentence indicating that the teacher must be part of the group to monitor the students. (5 points)
- 2- Students can create websites to do many of tasks, mention two of them. (4 points)
- 3- Mentioned in the text that the students will be very excited if the students take an online **lesson**, write it down.(3.p)
- 4- Teachers may ask students to write their online diaries on two topics, mention them. (4 points)
- 5- What does the underlined pronoun (**they**) refer to? (4 points)

Text Two (20 points)

In the 1940s, technology had developed enough for inventors to make the first generation of modern computers; one such model was so large that it needed a room that was 167 square meters to accommodate it. During that decade, scientists in England developed the first computer program. It took 25 minutes to complete one calculation. In 1958 CE, the computer chip was developed The first computer game was produced in 1962CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers. The first PC (personal computer) was produced in 1974CE, so people could buy computers to use at home. In 1983 CE, people could buy a laptop for the first time. Then, in 1990 CE, the British scientist Tim Berners-Lee developed the World Wide Web. It was not until 2007 CE that the first Smartphone appeared. Today most people used their mobile phones every day. You can already buy watches which can do the same as mobile phones. Scientists have also developed glasses that are capable of doing even more than this. Life is going to see further changes in computer technology. It is likely that all aspects of everyday life will rely on a computer program, from how we travel to how our homes are heated

- 1- Many developments around the computer occurred in the period **1940-1964**, write four of them. (8 points)
- 2- In what year was the computer mouse produced? (3 points)
- 3- Find a word in the text which means (**to have trust or confidence in something or someone**). (4 points)
- 4- Quote the sentence showing that a computer model took a long time to complete a calculation. (5 points)
