Question Two: Read the following texts carefully, and then answer the questions that follow.

Text One:

Many classrooms now use a whiteboard as a computer screen. As a consequence, teachers can show websites on the board in front of the class. Teachers can then use the Internet to show educational programmes, play educational games, music, recordings of languages, and so on.

In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to do tasks such as showing photographs, researching information, recording interviews and creating diagrams. Tablets are ideal for pair and group work.

Teachers can perhaps ask their students to start writing a blog (an online diary), either about their own lives or as if they were someone famous. They can also create a website for the classroom. Students can contribute to the website, so for example they can post work, photos and messages.

Most young people communicate through social media, by which they send each other photos and messages via the Internet. Some students like to send messages that are under 140 letters for anyone to read. Teachers can ask students to summarise information about what they have learnt in class in the same way. If students learn to summarise quickly, they will be able to use this skill in future.

Another way of communicating with other schools is through talking to people over the computer. Most computers have cameras, so you can also see the people you are talking to. In this way, students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to them. You can also use this system to invite guest speakers to give talks over a computer. For example, scientists or teachers from another country could give a lesson to the class. If you had this type of lesson, the students would be very excited.

Students often use computers at home if they have them. Students can use social media on their computers to help them with their studies, including asking other students to check and compare their work, asking questions and sharing ideas. The teacher must be part of the group, too, to monitor what is happening.

1. Teachers can use the internet for many purposes. Write down three of these purposes.
2. There are many benefits of using tablets to do tasks. Write down three of these tasks.
3. The blog might consist of two elements. Write these two elements down.
4. Write down the sentence which shows how students can contribute to the website.
5. What does the underlined word " **they**" in the text refer to.
6. The guest speakers who could give a lesson are divided into two groups. Write them down.
7. It is said that technology could have many disadvantages. Think of this statement, and then, in two sentences. Write down your point of view.

Text Two:

Most doctors used to be sceptical about the validity of homoeopathy, acupuncture and other forms of complementary medicine. If patients wanted to receive this kind of nonconventional treatment, they used to have to consult a private practitioner who was likely not to have a medical degree. However, in recent years, the perception of this type of treatment has changed. These days, many family doctors study complementary medicine alongside conventional treatments, and many complementary medicine consultants also have medical degrees.

Whereas critics used to say that there was no scientific evidence that non-conventional treatments actually worked, now it is more common for medical experts to recognise that conventional medicine may not always be the only way to treat an ailment.

At a surgery in London, 70 per cent of patients who were offered the choice between a herbal or a conventional medicine for common complaints such as insomnia, arthritis and migraines chose the herbal remedy. Fifty per cent of patients then said that the treatment helped.

One doctor said, "I now consider homoeopathy to be a viable option for many different conditions, including anxiety, depression and certain allergies. It provides another option when conventional medicine does not address the problem adequately."

However, complementary medicine cannot be used for all medical treatments. It can never substitute for immunisations as it will not produce the antibodies needed to protect against childhood diseases. It also cannot be used to protect against malaria.

One doctor said, "I will always turn to conventional medical treatment first to ensure that no underlying condition is missed. However, the idea of complementary treatments is no longer an alien concept. In my opinion, it should work alongside modern medicine, and not against it."

- 1) People's perception for this type of medicine has changed for many reasons. Write down two of these reasons.
- 2) There are many examples for common complaints mentioned in the text. Write down three of these common complaints.
- 3) Complementary medicine cannot be used for all medical treatments for three reasons. Write down these three reasons.
- 4) Homeopathy is considered to be a viable option for many different conditions. Write down three of these conditions.
- 5) Quote the sentence which shows that most doctors didn't use to be convinced about the effectiveness of complementary medicine.
- 6) What does the underlined word "it" in the text refer to.
- 7) Find a word in the text which means " **giving a drug to protect against illness**".

Text Three:

Ten-year-old Adeeb al-Balooshi, from Dubai, is going to travel to seven countries on a tour which has been organised and funded by Sheikh Hamdan bin Mohammad, Crown Prince of Dubai.

The boy caught Sheikh Hamdan's attention with his invention – a prosthetic limb for his father. The Sheikh has taken a special interest in the boy, and hopes the tour that **he** is sponsoring for Adeeb will give the young inventor more self-confidence and inspire other young Emirati inventors.

Adeeb got the idea for a special kind of prosthetic leg while he was at the beach with his family. His father, who wears an artificial leg, could not swim in the sea as he could not risk getting his leg wet. This inspired Adeeb to invent a waterproof prosthetic leg.

Adeeb is going to visit the USA, France, the UK, Ireland, Belgium, Italy and Germany, where he will be staying with relatives. However, while he is in Germany, Adeeb will not be spending all his time sightseeing. He will be working with a specialist doctor to build the appendage. He will also be attending a course on prosthetics and learning about different kinds of medical apparatus.

Adeeb has invented several other devices, including a tiny cleaning robot and a heart monitor, which is attached to a car seat belt. In the case of an emergency, rescue services and the driver's family will be automatically connected with the driver through this special checking device. He has also invented a fireproof helmet. This special equipment, which has a built-in camera system, will help rescue workers in emergencies.

It is for these reasons that Adeeb rightly deserves his reputation as one of the youngest inventors in the world.

1) Sheikh Hamdan bin Mohammad offered Adeeb the gift of a world tour for many reasons. Write down two of these reasons.

2) Adeeb is going to visit many countries in his tour. Write down four of these countries.

3) Adeeb will be doing many things while he is in Germany. Write down three of these things.

4) What does the underlined word "**he**" in the text refer to?

5) Find the suffix in the text which means "**provide protection against**".

6) Write down the sentence which means Adeeb has a reputation for being one of the youngest inventors in the world.

7) Write down three devices that Adeeb has invented?

8) The government of any country should support young inventors. Explain this statement. Suggesting three ways to support young inventors.

B: Literature Spot

- Read the following lines from *Around the World In Eighty Days* and then answer the questions that follow.

The train stopped at eight o'clock, in the midst of a glade some fifteen miles beyond Rothal, where there were several bungalows and workmen's cabins. The conductor, passing along the carriages, shouted, 'Passengers will get out here!'

'Where are we?' asked Sir Francis.

'At the hamlet of Kholby.'

'Do we stop here?'

1) When did the train stop?

2) Where did the train stop?

3) Find the word which means "a small house with one floor".

4) Who was shouting along the carriages?

5) Why did the train stop at first place?

'Yet you sell tickets from Bombay to Calcutta,' retorted Sir Francis, who was growing warm. 'No doubt,' replied the conductor, 'but the passengers know that they must provide means of transportation for themselves from Kholby to Allahabad.'

'Sir Francis,' said Mr Fogg quietly, 'we will, if you please, look about for some means of conveyance to Allahabad.'

6) Find the expression which means "getting annoyed".

7) Write down the name of two cities from the lines above.

8) How did Mr Fogg react to the situation?

'Not at all, but I knew that some obstacle or other would sooner or later arise on my route. Nothing, therefore, is lost. I have two gained days to sacrifice. A steamer leaves Calcutta for Hong Kong at noon, on the 25th. This is the 22nd, and we shall reach Calcutta in time.' There was nothing to say to so confident a response.

9) Find the word which means "a ship powered by steam".

10) When did the steamer leave for Hong Kong?

11) What is the idea in the lines above?

They soon reached a small hut. Enclosed within some high palings, was the animal in question. An Indian came out of the hut, and, at their request, conducted them within the enclosure. The elephant, which was reared, not to be an animal that merely carried things around, but for warlike purposes, was half-domesticated.

12) Which words tell us that the animal is kept safely?

13) Why did the Indian decide to rear the elephant?

Happily, however, for Mr Fogg, the animal's instruction in this direction had not gone far, and the elephant still preserved its natural gentleness. Kiouni – this was the name of the elephant – could doubtless travel rapidly for a long time, and, in default of any other means of conveyance, Mr Fogg resolved to hire him. However, elephants are far from being cheap in India as they are becoming scarce.

14) What was the name of the elephant?

15) How do we know that the animal is unaggressive?

16) Why elephants are not cheap in India?

17) What did Mr Fogg resolve?

A young Parsee, with an intelligent face, offered his services, which Mr Fogg accepted, promising so generous a reward as to materially stimulate his zeal. The elephant was led out and equipped. Provisions were purchased at Kholby, and, while Sir Francis and Mr Fogg took the howdahs on either side,

18) Find the word which means " a person living in South Asia but descended from Persia".

19) Find the word which means " a seat for riding an elephant".

20) Why did Mr Fogg promise the Parsee so generous a reward.

Mr Fogg and Sir Francis Cromarty, after searching the village from end to end, came back without having found anything.

‘I shall go afoot,’ said Phileas Fogg.

Passepartout, who had now rejoined his master, made a wry grimace, as he thought of his magnificent, but too frail Indian shoes. After a moment’s hesitation, he said, ‘Monsieur, I think I have found a means of conveyance.’

21) How did both Mr Fogg and Francis return from their searching?

22) Why did Passepartout face shows unhappiness?

23) Find the expression which means " unhappiness or pain".

24) Who decided to complete the journey on foot?

Question Two: (27 points)

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the text.

Ibn Bassal was a writer, a scientist and an engineer who lived in Al-Andalus in the eleventh century CE. He worked in the court of Al-Ma'mun, who was the King of Toledo. His great passions were botany and agriculture. Although he was a great scholar, he was also a practical man and all of his writing came from his own 'hands-on' experience of working the land. One of the many things which Ibn Bassal achieved was *A Book of Agriculture*. The book consisted of sixteen chapters which explain how best to grow trees, fruit and vegetables, as well as herbs and sweet-smelling flowers. The most famous chapter of all was the one that described how to treat different types of soil. Ibn Bassal also worked out how to irrigate the land by finding underground water and digging wells.

The influence of Ibn Bassal's book was enormous. As farmers down the generations followed his instructions and advice, the land became wonderfully fertile and produced more than enough food for the fast-growing population. Although his name is not widely known, Ibn Bassal's legacy to the world has been great.

Question Three: (33 points)

A) Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the text. (27 points)

It is important to know some tips if you want to make a sales pitch

1 Do your research

Don't come away from a sales pitch wishing you had been better prepared. It is essential to know everything about your product. Do you know when it was developed, and where it is produced? You also need to know who the target market is – for example, the age group or income of the people who might buy it. Not only that, you should know all about the competition – that is, similar products on the market. Why is your product superior to others? In addition, you should know exactly which people you are speaking to, and what their needs are.

2 Prepare and practise

Plan your presentation carefully, not just what you will say, but how you will say it. Will you read it word by word, use notes or memorise it? Whatever you decide, it is always a good idea to have a list of your main points, in case something interrupts you or you simply freeze with nerves.

3 Be professional

Keep your presentation short and simple. Start with some friendly comments. For example, thank your hosts for allowing you to speak to them, and compliment their company. Remember to speak slowly and clearly. It is important to appear confident.

1. There are certain essential points one should research about a product before making a sales pitch. Write down three of these points. (9 points)
2. The text states two examples of friendly comments. Write them down. (6 points)
3. What does the underlined word "it" refer to? (3 points)
4. Write down the sentence which indicates the importance of listing the main points when doing a presentation, no matter how it is performed. (3 points)
5. The body language of a person who makes a sales pitch is helpful for increasing the sales. Suggest three possible gestures one can make to be successful in the field. (6 points)

B) Literature spot (6 points)

Question Four: (20 points)

FREE WRITING:

In your ANSWER BOOKLET, write a composition of about 120 words on ONE of the following:

1. Learning foreign languages has many advantages as it provides various opportunities in life. Write an essay discussing the importance of learning foreign languages and its effects on the learner's social and academic life.
2. Many jobs require ongoing training and research to stay competitive in a world with rapidly evolving information and technology. Some believe that it is the responsibility of companies to pay for this training for their staff while others feel it is the responsibility of the employees. Write an essay discussing which point of view you support mentioning the advantages of the ongoing training and research for individuals and their work.
