The sentence that has a similar meaning to the one above is:

- A. Some politicians are used to being strict during strike riots.
- B. Some politicians are used to be strict during strike riots.
- C. Some politicians aren't used to being strict during strike riots.
- D. Some politicians used to being strict during strike riots.

25. Monday / my job / will be working / Next / in / I / new

The sentence that has the correct order of the words and phrases above is:

- A. Next working, I in will be Monday in my new job.
- B. Next Monday, I will be working in my new job.
- C. Next Monday, I will be job working in my new job.
- D. Next job, I will be working in my new Monday.

26. Some robots will look and sound very like humans.

- The rhetorical device used in the above sentence is is.....

- | | |
|-----------------|--------------------|
| A. metaphor | B. personification |
| C. onomatopoeia | D. simile |

27. Have you heard the good news..... We have got the green light to go ahead with our project.....

- The suitable punctuation marks to complete the above sentence is:

- | | | | |
|----------|----------|----------|----------|
| A. , / ? | B. . / . | C. ? / ! | D. ? / , |
|----------|----------|----------|----------|

29. When my grandfather had a heart attack.....the doctor attached a specialto his chest.

- A. ? / moneter B. . / monitor C. , / moneter D. , / monitor

30. The aim of this report is to develop effective ways to save water in Jordan.

The above sentence in a report represents one of the following:

- A. A recommendation C. A conclusion
B. An introduction D. A reporting information

QUESTION TWO

Read the following two texts, and then answer all the questions that follow.

Text A

In many countries, an increasing number of young people and adults are overweight or even obese. One such reason for this is the growing popularity of fast food, which didn't use to be as common as it is now. Another big factor is lack of exercise. People would often walk to school or work, but these days many more of us drive. Modern technology has also played its part; we spend more and more time focusing on computers screens.

Health experts have been warning about this trend for years, and their advice is clear. Adults should aim to exercise, for at least two and half hours every week, for children and teenagers the target should be at least an hour a day. School children are less physically active than they used to be. Girls in particular often dislike PE. This can lead to serious health problems.

Experts recommend a mixture of activities. These should include moderate exercise, such as fast walking and more strenuous exercise, like running. They also advise exercise that strengthens the muscles for example sit-up.

Of course this raises a question: how can I manage to fit in all this extra exercise? The best way is to build it into our daily lives so that it becomes a routine. It doesn't have to take much extra time. You could get off the bus one stop earlier than usual, or stand up when you are on the phone! Most importantly we should find a sport that we enjoy doing. That way, we will become healthier and happier.

1. According to the text, mention three main reasons for higher rates of obesity.
2. Mention the minimum amount of exercise that is recommended for adults every week.
3. Quote the sentence which shows that girls don't like doing exercise.
4. According to the text, there are many kinds of exercise. Mention two of them.
5. Find a word in the text that means **extremely fat**.
6. The text states certain way to deal with different types of exercise. Mention this way.
7. Girls generally dislike doing sport. Think of this statement and write down your point of view.

Text B

Scientists have already developed brain implants that improve vision or allow disabled people to use their thoughts in order to control prosthetic limbs like arms, legs or hands, or operate a wheelchair. In 2012 CE, research on monkeys showed that a brain implant improved their decision-making abilities.

They suggested that, in the future, more meaningful dialogue with patients in a coma would be possible. Two years later, it has finally happened. The scanner, used on a man who has been in a coma for more than twelve years, proves that he has a conscious, thinking mind – a fact that had previously been disputed by many. Doctors plan to use similar brain-scanning techniques in the future to find out whether patients are in pain, or what they would like to be done in order to improve their quality of life.

A new cancer drug is being trialed in Plymouth, UK, which doctors hope will extend the lives of cancer patients and reduce their symptoms overnight. It is taken as a single pill every morning, and so far patients have shown none of the usual side effects such as the sickness and hair loss that are experienced when undergoing other forms of cancer treatment. The new treatment works by blocking a protein which causes cancerous cells to grow. It will improve patients' life expectancy and quality of life much more quickly than any other treatment. The patients were interviewed a year after starting the treatment and are fit and well, saying that they are definitely going to continue the trial. They have every reason to believe the new drug is going to work.

1. According to the text, there are many benefits of the new cancer drug. Write down two benefits.
2. There are two side effects which appear when patient undergo the usual cancer treatment. Write down these two side effects.
3. According to the text, doctors plan to use similar brain –scanning techniques in the future. Mention two reasons for that.
4. Quote the sentence which explains how the new cancer drug works.
5. The text mentions the benefits of brain implants for people. Mention these benefits.
6. What does the underlined pronoun (it) refer to?
