	would practice the presentation sev		
ט) וו ו were you, you wou	ald practice the presentation severa	a umes.	

Question Number Three (15 points)

Read the following two texts carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the texts.

The King Hussein Cancer Center (KHCC) is Jordan's only comprehensive cancer treatment center. It treats both adult and pediatric patients. As the population of the country increases, more and more families will rely on the hospital for cancer treatment. Patients come not only from Jordan but also from other countries in the region, as they are attracted by its excellent reputation, lower costs, and cultural and language similarities.

In order to cope with the increase in demand for treatment, the KHCC has begun an expansion program which will include different stages. The hospital will have more than doubled its capacity; increasing space for new cancer cases from 3,500 per year to 9,000. By then, they will have added 182 extra beds. New adult and pediatric wards will have opened. Additionally, they will have built a special ten-floor outpatients building, with an education center. Many cancer patients live far away from the KHCC, and the journey to and from the hospital is often difficult. For this reason, there are plans to extend cancer care facilities to other parts of Jordan.

- 1- The expansion program that has been started in the KHCC includes different stages. Write down three of these stages. (3 points)
- 2- Patients come from other countries to receive treatment in the KHCC for three different reasons. Write them down. (3 points)
- 3- Quote the sentence that states the reason for extending cancer care facilities to other parts of Jordan. (3 points)
- 4- Find a word in the text which means "describing the area of medicine that deals with children and their illnesses".

(3 points)

5- Mention the number of cancer patients that the KHCC will treat at the end of the expansion program me.

(3 points)

Question Number Two (16 points)

Read the following two texts carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the texts.

These days, many family doctors study complementary medicine alongside conventional treatments, and many complementary medicine consultants also have medical degrees. Whereas critics used to say that there was no scientific evidence that non-conventional treatments actually worked, now it is more common for medical experts to recognize that conventional medicine may not always be the only way to treat an ailment.

At a surgery in London, 70 percent of patients <u>who</u> were offered the choice between a herbal or a conventional medicine for common complaints such as insomnia, arthritis and migraines chose the herbal remedy. Fifty percent of patients then said that the treatment helped. One doctor said, "I now consider homoeopathy to be a viable option for many different conditions, including anxiety, depression and certain allergies. It provides another option when conventional medicine does not address the problem adequately."

However, complementary medicine cannot be used for all medical treatments. It can never substitute for immunization as it will not produce the antibodies needed to protect against childhood diseases. It also cannot be used to protect against malaria.

One doctor said, "I will always turn to conventional medical treatment first to ensure that no underlying condition is missed. However, the idea of complementary treatments is no longer an alien concept. In my opinion, it should work alongside modern medicine, and not against it."

- 1- Certain medical conditions may possibly be treated using complementary medicine. Write down four of these medical conditions. (4 points)
- 2- What are the two cases that complementary medicine can't be used for? (2 points)
- 3- According to the text, we can't use complementary medicine with immunization. Mention the reason. (3 points)
- 4- According to some doctors, when can we use complementary medicine? (2 points)
- 5- What was the percentage of patients who chose conventional medicine for common complaints at a surgery in London? (2 points)
- 6- What does the underlined pronoun (**who**) refer to?

(THE END)

(3 points)
