Read the following texts carefully, and then in your ANSWER BOOKLET answer all questions that follow. Your answer should be based on the text.

Ibn Bassal was a writer, a scientist and an engineer who lived in Al-Andalus in the eleventh century CE. He worked in the court of Al-Ma'mun, who was the King of Toledo. His great passions(interests) were botany , which is the study of plants ,and agriculture. Although he was a great scholar, he was also a practical man and all of his writing came from his own 'hands-on 'experience of working the land.

One of the many things which Ibn Bassal achieved was A Book of Agriculture. The book consisted of sixteen chapters which explain how best to grow trees, fruit and vegetables, as well as herbs and sweet-smelling flowers; perhaps the most famous chapter of all was the one that described how to treat different types of soil. Ibn Bassal also worked out how to irrigate the land by finding underground water and digging wells. He designed water pumps and irrigation systems. All of these things were passed on through his writing

The influence of Ibn Bassal's book was enormous. As farmers down the generations followed his instructions and advice, the land became wonderfully fertile and produced more than enough food for the fast-growing population. You need to do your research to make sales pitch. It is essential to know everything about your product. Do you know when it was developed, and where it is produced? You also need to know who the target market is – for example, the age group or income of the people who might buy it. Not only that, you should know all about the competition – that is, similar products on the market. Why is your product superior to others and why does it have better value?

In addition, you should know exactly which people you are speaking to, and what their needs are. For example, if they represent a middle-class department store in a humble neighbourhood, be ready to explain why your particular product would suit customers who do not have lots of money. What makes your product perfect for them? Most of all, you need to believe in what you're selling, and the best way to do that is to use it!

Plan your presentation carefully, not just what you will say, but how you will say it. Will you read it word by word, use notes or memorize it? Whatever you decide, it is always a good idea to have a list of your main points, in case something interrupts you, or you simply freeze with nerves (it happens!). Then practise it, if possible in front of colleagues. Make changes and practise it again.

The way in which you can be professional to make sales pitch is to keep your presentation short and simple. Start with some friendly comments. For example, thank your hosts for allowing you to speak to **them**, and compliment their company. Remember to speak slowly and clearly. It is important to appear confident (even if you're nervous!). While you're speaking, don't keep your head down. Instead, look round the room and make eye contact with your audience. Smile! When you've finished speaking, invite questions. If you don't know the answers, don't pretend! Thank the questioner and promise to find out the answer (and do it!). Finally, have a summary of your presentation ready to hand out at the end of the session.

الدورة الشتوية - المستوى الرابع (الوحدة التاسعة) الاستاذ عمر جوارنه

DATE: Sunday 14th of June , 2022

TIME: Two hours

ملحوظات: (1) اجب عن أسئلة هذه الورقة جميعها (2) للمتقدمين في الفروع الأكاديمية والمهنية

Read the following text carefully, and then in your ANSWER BOOKLETE answer all questions that follow.
Your answer should be based on the text.

Whether you're selling a new type of toothpaste to a chain of pharmacies, the latest computer software to a school or a new kind of package holiday to a travel agency – you need to know how to make a sales pitch. you should firstly do your research, so it is essential to know everything about your product. Do you know when it was developed, and where it is produced? You also need to know who the target market is – for example, the age group or income of the people who might buy it.

Not only that, you should know all about the competition – that is, similar products on the market. Plan your presentation carefully, not just what you will say, but how you will say it. Will you read it word by word, use notes or memorise it? Whatever you decide, it is always a good idea to have a list of your main points, in case something interrupts you, or you simply freeze with nerves (it happens!).

To be professional, Keep your presentation short and simple. Start with some friendly comments. For example, thank your hosts for allowing you to speak to them, and compliment their company. Remember to speak slowly and clearly. It is important to appear confident (even if you're nervous!). While you're speaking, don't keep your head down. Instead, look round the room and make eye contact with your audience. Smile! When you've finished speaking, invite questions. If you don't know the answers, don't pretend! Thank the questioner and promise to find out the answer (and do it!). Finally, have a summary of your presentation ready to hand out at the end of the session.
